Core Strategy
Adopted February 2011

Local Development Framework

Sevenoaks District Council
The Core Strategy is the new plan for the future development of the District. It was adopted by the Council on 22 February 2011 after extensive consultation and examination by an independent inspector.

The Core Strategy covers the period to 2026. It sets out what development will happen, where it will be located, when it will take place and what requirements it has to meet. It also explains what areas will be protected from development and explains how the environment will be safeguarded. More detailed policy guidance based on the Core Strategy will be given through other development plan documents and supplementary planning documents.

The Strategy directs most development to land within existing urban areas, with only minor development within villages, while the District’s countryside and its biodiversity will continue to be protected.

The Strategy is a vital tool for the protection of our attractive District and I would like to thank everyone who has contributed to the successful outcome.

Councillor Jill Davison

Portfolio holder for Continuous Improvement and Strategic Planning

Sevenoaks District Council.

1. Role of the Core Strategy
1.0.1 The Core Strategy is the first Development Plan Document to be prepared by the District Council and is the central component of the new Local Development Framework. It sets out the vision and policies for future development in the District over the period to 2026 as well as providing the policy context for other Development Plan Documents. It has been prepared in accordance with the Statutory Regulations covering the preparation of Development Plan Documents.

1.0.2 While the Core Strategy sets out the general approach to the scale and location of development, it does not deal with specific development sites, nor does it deal with the most detailed policy issues. These will follow in the Allocations and Development Management DPD. In addition Supplementary Planning Documents (SPDs) will be used to expand on specific policies.

1.0.3 In the meantime, relevant adopted Local Plan policies have been “saved” so that they continue to have effect until replaced by a new adopted LDF policy. Saved policies to be replaced by the Core Strategy are listed in Appendix 2. The proposals map of the adopted Local Plan is also “saved” and should continue to be used for detailed boundary identification purposes until the Allocations and Development Management DPD is adopted.

1.0.4 The Core Strategy forms part of the Development Plan for Sevenoaks District and must be consistent with national planning guidance and conform with regional policy in the adopted South East Plan. The relationship of the Core Strategy to other policy documents is shown in the diagram.
1.0.5 The stages of production for the Core Strategy are outlined below

- Consultation on Issues and Options

1.0.6 The Council undertook extensive consultation with a wide range of stakeholders starting at the end of 2004 and then developed a series of policy options which were tested via a survey in June 2006.

- Consultation on Preferred Options

1.0.7 Preferred Options were first consulted on during October 2006. As a result of responses received and new Government guidance, the Council decided that further work was required. The revised Preferred Options document was prepared and was consulted on during January to March 2009.

- Draft for Submission

1.0.8 Following consultation on the Preferred Options, the Council prepared the Draft for Submission which was submitted to the Secretary of State.

- Public Examination

1.0.9 The Core Strategy was subject to examination by an independent Inspector. It was found sound subject to changes set out in the Inspector’s Report and incorporated into the adopted plan.

- Adoption

1.0.10 The Core Strategy was adopted by the Council on the 22 February 2011

Structure of the Document

1.0.11 The document is structured as follows:

- What is Sevenoaks District Like? - A brief description of the District
- Spatial Vision - Sets out the key influences and issues and the vision and objectives for the plan.
- Location Policies - Covers the distribution of development in the District - what will take place where.
- Strategic Policies - General policies which will apply to development across the District.
- Appendices - Contain additional and supporting information
1. Role of the Core Strategy

Sevenoaks District Council Core Strategy Adopted February 2011
2. What is the District like?
2.0.1 Sevenoaks is a large District lying to the south east of London with an overall area of just over 143 square miles (370 square km). It is long and relatively narrow measuring 20 miles north-south by about 7 miles east-west. The Thames Gateway lies to the north, Surrey and East Sussex to the west and south and the rest of Kent, including Tonbridge and Tunbridge Wells to the east and south east. Despite adjoining the outer edge of London it is predominantly rural with 93% of the District designated as Green Belt.

2.0.2 The quality of the landscape is a distinctive feature of the area. The national significance of the landscape is recognised by the inclusion of 60% of the District within either the Kent Downs (to the North) or High Weald (to the South) Areas of Outstanding Natural Beauty. There are also extensive areas recognised for their nature conservation importance. It is rare to find such extensive areas of high quality landscape so close to London.

2.0.3 The District also has an important historic and cultural legacy with 17 nationally designated historic parks and gardens including Knole House and Park. Sevenoaks also has a number of historic houses including Penshurst Place, Hever Castle and Lullingstone Roman Villa. The District features a substantial legacy of historic towns and villages, with 40 Conservation Areas, 2,112 listed buildings and 23 scheduled ancient monuments.

2.0.4 The District’s population is 109,305 (2001 Census data) of which about half live in the settlements listed in Table 1.

Note: 1. Includes the urban area covering Sevenoaks town, Riverhead, Dunton Green, Chipstead and Bessels Green.
Source: 2001 Census.

2.0.5 Sevenoaks urban area is the principal settlement with the widest range of services and facilities. It has a successful town centre with a good range of shops and services. It is an important centre for commuting to London and is the main employment centre in the District.
2.0.6 Swanley is the second largest settlement within the District and is located close to the edge of Greater London. Although it is an important employment centre and has good bus and rail connections, it provides fewer services and facilities than Sevenoaks. The town is developed to a higher density with less green space than other parts of the District.

2.0.7 Edenbridge is the main centre in the rural south of the District. It has a good range of services and employment provision, but lacks some facilities e.g. a secondary school. It has good rail connections but is less well-connected to the main road network than Sevenoaks or Swanley.

2.0.8 Other larger villages include New Ash Green, which was built as a planned village in the 1960’s, Hartley, Otford and Westerham.

2.0.9 Half the population live in the 40 or so villages and hamlets that are scattered throughout the District. These vary in the size of population, the number and range of services available (such as a primary school, village shop, doctor’s surgery, community hall, recreation ground) and access to public transport. However, as with many rural areas, the services and facilities are continually under threat.
2. What is the District Like?

Figure 2: Sevenoaks District
2.0.10 Whilst the main centres of employment are concentrated around the largest settlements, there are some significant major developed sites in the Green Belt.

2.0.11 Parts of the District are liable to flood. Historically, flooding has occurred within the catchments of the Rivers Darent and Eden. Areas with a high probability of fluvial flood risk (1 in 100 year event) are identified in and around Edenbridge, to the north of Sevenoaks, and along the Darent Valley. There are also other areas which are at risk of more localised flooding.

2.0.12 Major roads crossing the District are the M25, M26, M20, A25, A20 and A21. These provide access to Greater London, Gatwick, Heathrow and Stansted airports, and the Channel Ports as well as Ashford and Ebbsfleet international stations. Rail services are focused on links to London though services also serve stations towards the Kent/Sussex coasts, Redhill, Uckfield and East Croydon. The proximity of the District to Central London means that there are high levels of commuting, particularly by train. Over 16% of those in employment commute by train to work compared with fewer than 6% in the South East as a whole.

2.0.13 The age profile of the District’s population is slightly older than the South East average and the trend towards an ageing population is set to continue in the future. The District is distinguished by relatively high levels of home ownership (76% compared to 73% for the South East as a whole), a relatively high proportion of households living in detached properties (34% compared to 29% in the South East) and a low proportion living in flats (12% compared to 18% for the South East). These factors, together with the proximity of London, have an impact on the affordability of housing, with average house prices for all properties which are almost £150,000 (Q2 2009) greater than the South East average.

2.0.14 Unemployment in the District is relatively low at 1.8% (March 2011) compared to 2.6% for the South East, though in common with other areas it has risen due to the impact of the recession. The 2001 Census showed that 76% of the population had a qualification which is similar to the South East though higher than the national figure of 71%. Levels of car ownership are high with over 44% of households owning two or more cars (compared with nearly 38% for the South East).

2.0.15 Prior to the economic downturn the local economy had experienced growth. The majority of businesses are small and in service or office based sectors. However, local businesses face problems of recruiting and retaining staff due to the high cost of housing and the pull of higher salaries elsewhere, especially in London. The agricultural economy has traditionally played an important role in the District though farmers are diversifying their economic base by re-use of existing buildings and the development of new enterprises that do not necessarily relate to traditional farm uses.

2.0.16 The overall impression of affluence masks local pockets of urban and rural deprivation. Six out of the 74 Lower Layer Super Output Areas, the smallest area for which the level of deprivation is measured, are more deprived than the UK average. Five of these areas, including the two worst, are within Swanley and one is in Hartley.
2. What is the District Like?
3.1 Introduction

3.1.1 The vision is central to the Core Strategy. It sets out what the District and the places within it should be like at the end of the plan period in 2026 and provides the context for framing objectives and policies, whose ultimate purpose is to ensure the vision is delivered.

3.1.2 The vision should be consistent with other strategies at a local level, reflect the national and regional strategic policy context, take account of development in adjoining areas, reflect the views of the community and be underpinned by an analysis of the issues facing the District. These key influences are outlined below.

3.2 Key Influences

National and Regional Policy

3.2.1 Local Development Frameworks are required to be consistent with national policy and must conform to regional policy. National policy is set out in a series of Planning Policy Statements dealing with specific issues.

3.2.2 Regional policy is contained in the South East Plan, which was published in 2009. The Plan contains strategies for a series of sub regions. Sevenoaks town and the area to the west and north west lie within the “London Fringe” Sub Region, while the remainder of the District is included in the “Rest of Kent”. The plan sets a minimum housing provision for the District of 165 dwellings per annum with a broad split of 85/80 dwellings per annum between the London Fringe and the Rest of Kent. Policies from the plan are referred to where relevant elsewhere in this document. The Core Strategy was drafted to be in conformity with the South East Plan.

The Sevenoaks District Sustainable Community

The Community Plan vision is:

“We want Sevenoaks District to be recognised by all as a place with:

• Safe and caring communities
• A green and healthy environment
• A dynamic and sustainable economy”

It includes a series of priorities linked to the vision. Outcomes, aims, actions and targets flow from the priorities, including identifying specific issues for consideration in the LDF.

3.2.3 The Community Plan entitled “Making It Happen – Together” was published in 2004 and the action plan was updated in 2007. It is currently being reviewed following an approach that continues to emphasise the links with the Core Strategy. The plan is overseen by the Local Strategic Partnership, which includes a wide range of Governmental, business and voluntary groups. The plan is linked to the Vision for Kent, the community strategy for the County, and to the Kent Local Area Agreement outcomes.

3.2.4 The Core Strategy is consistent with the Community Plan and the vision represents the spatial expression of the Community Plan. Appendix 3 shows how the Core Strategy implements relevant parts of the current Community Plan.
Other Strategies and Plans

3.2.5 The spatial vision also takes account of a number of other local strategies and plans. Some of these have been prepared in parallel with the Core Strategy in which case they have taken into account the emerging Core Strategy while the Core Strategy itself has taken into account other relevant emerging strategies. Other strategies linked to the Community Strategy include the Council’s:

- Housing Strategy (currently being reviewed)
- Community Safety Strategy
- Young People’s Action Plan, aimed at enhancing the lives of young people
- Air Quality Action Plan, which contains proposals for action relating to the District’s designated Air Quality Management Areas

3.2.6 The West Kent Area Investment Framework, produced by the West Kent Partnership (covering Sevenoaks, Tonbridge and Malling and Tunbridge Wells Districts) outlines a vision and priorities for the economy of West Kent. It has recently been reviewed. The Council has also prepared an Economic Development Action Plan.

3.2.7 The relevant statutory transport plan is the Local Transport Plan produced by Kent County Council. A Sevenoaks District Strategy for Transport was published for consultation in October 2009 and has been prepared in parallel with the Core Strategy. Key features are summarised in the box following paragraph 3.4.3.

3.2.8 The Council recently adopted revised Management Plans for the High Weald and Kent Downs AONBs.

Consultation and Engagement

3.2.9 This document follows extensive public consultation on Issues and Options and on the Preferred Options carried out in accordance with the Statement of Community Involvement. *(1)* The initial consultation was carried out jointly with consultation on the Community Strategy.

3.2.10 The results of the consultation showed strong public support for protection of the Green Belt, for development to be directed to brownfield land, to the most sustainable and accessible locations and to where infrastructure and services have most capacity and to focus development on built up towns and villages. It also showed support for more affordable housing, allocating more employment land, protecting community services and facilities, protecting open space, requiring high standards of design, energy efficient and sustainable building techniques and for promoting more sustainable transport choices through the planning process.

3.2.11 Engagement has taken place with key statutory consultees. Particular emphasis has been placed on engagement with infrastructure providers, to identify future infrastructure needs.

Background Research

3.2.12 The Council has undertaken a series of background research studies to explore the issues the Core Strategy has to consider and guide the development of policy. These studies provide the evidence that underpins the Core Strategy.

---

*(1)* Available at the planning policy and local development framework section of the Sevenoaks District website (www.sevenoaks.gov.uk)
3.2.13 The studies (2) listed here and their findings are referred to in relevant sections later in the document.

- Affordable Housing Viability Assessment (2009)
- Countryside Assessment (2004)
- Employment Land Review (2007)
- Hotel Futures Update (2007)
- Open Space, Sport and Recreation Study (2008)
- Population and Social Profile (2009)
- Retail Study (2005 with updates in 2007 and 2009)
- Settlement Hierarchy (2009)
- Strategic Flood Risk Assessment (2008)
- Strategic Housing Land Availability Assessment (2008, updated in 2009)
- Strategic Housing Market Assessment (2009)
- Transport Study (2007)
- Gypsy and Traveller Study (2006)

3.2.14 A series of topic papers providing further information on how the research studies and the strategic planning context have influenced the Core Strategy will be available on request from the Council.

Sustainability Appraisal

3.2.15 Sustainability appraisal was used to help evaluate alternatives selecting preferred options. Sustainability appraisal enables plans and policies to be tested to see how well they perform against economic, social and environmental objectives. It helps in developing vision, strategies and policies that work towards achieving sustainable development, offering economic, social and environmental benefits.

3.2.16 A report on the appraisal process has been published separately. (3)

3.2.17 A separate “Appropriate Assessment” (4) of the likely effects of the plan on sites of international importance for nature conservation has been completed.

---

3 Available at the Core Strategy pages of the planning policy and local development framework section of the Sevenoaks District Council website (Sevenoaks.gov.uk)

4 Available at the evidence base pages of the planning policy and local development framework section of the Sevenoaks District Council website (Sevenoaks.gov.uk)
Issues and Challenges

3.2.18 Key issues the strategy needs to tackle are set out below. These are derived from understanding the nature of the District; the direction of other strategies and plans, including the Community Strategy; future trends revealed through research and local concerns expressed through engagement with stakeholders as outlined above.

1. Meeting future development requirements within an area constrained by the Green Belt

The District has to provide for new development. It has in the past been able to meet development requirements without the loss of Green Belt and the background studies (5) show future requirements can be met while continuing to maintain the Green Belt.

2. Making the best use of previously developed land in urban areas

Locating development in existing urban areas puts the focus on making efficient use of existing urban land to ensure that it contributes fully to providing for new development.

3. Conserving and enhancing the high quality of the natural and built environment.

Sevenoaks has a legacy of high quality landscapes and historic features, which need to be protected and appropriately managed for future generations.

4. Providing for future development in Sevenoaks Urban Area

In an area lacking large towns Sevenoaks is the District’s largest settlement with the greatest range of services. The strategy sets out the future role of the town and establishes the scope for future development, while protecting its environmental quality.

5. Improving Swanley

Swanley is the District’s second largest town. It is well-located close to M25 but there are issues of deprivation in some areas and the town centre needs improvement. Consequently a greater emphasis is placed on regeneration.

6. The future for the rural areas

Over 90% of the District is rural. The high quality of the rural environment needs to be conserved and enhanced while at the same time ensuring that the needs of rural communities are met and the rural economy can continue to develop in a sustainable way.

7. Improving the provision of affordable housing

Housing is expensive in the District and studies (6) show a high level of need from local people who cannot afford to buy on the open market. Ways of increasing provision of housing that is affordable to local people are examined.

---

5 See especially the Strategic Housing Land Availability Assessment and the Employment Land Review available at the evidence base pages of the planning policy and local development framework section of the Sevenoaks District Council website (Sevenoaks.gov.uk)

6 See the Strategic Housing Market Assessment available at the evidence base pages of the planning policy and local development framework section of the Sevenoaks District Council website (Sevenoaks.gov.uk)
8. Meeting the future housing needs of different groups

The District is characterised by family homes but population forecasts show a trend towards a growing elderly population, with likely growth in housing for people with special needs, and to smaller households. The type of future housing provision takes account of these emerging trends.

9. Maintaining a dynamic economy

A supply of land is needed to meet future business needs. The background studies show the potential contribution from maintaining and making effective use of existing employment land and from limited further development in Swanley.

10. Ensuring services and facilities are provided and maintained to meet the needs of the community.

The District is not a location where large scale expansion is planned but it is still important to ensure services and facilities are available to meet the changing needs of the population.

11. Responding to the challenges posed by climate change

The climate is changing and future development in the District needs to adapt to the potential impact of climate change and to minimise impacts that contribute to climate change.

3.3 The Spatial Vision

3.3.1 All of the above have helped to shape the Core Strategy and its spatial vision for the future of the District. The vision is set out below.

Sevenoaks District will provide for future development requirements by making effective use of urban land within existing settlements, while protecting the environment.

It will deliver an annual average of 165 dwellings (net addition), equivalent to 3,300 additional dwellings over the period 2006 to 2026 in a sustainable way. A balance of new housing will be achieved with increased provision of affordable housing, smaller homes and housing designed to meet the needs of older people. Accommodation for gypsies and travellers will also be increased.

The high quality natural built and historic environment will be conserved and enhanced, especially in those parts of the District designated to protect their distinct character. New development throughout the District will be of a high quality incorporating designs that respond to the distinctive local character of areas of high environmental quality or make a positive contribution to the environmental enhancement of other areas. The design of new development will incorporate sustainability principles taking into account potential climate change. A Green Infrastructure Network will be developed including areas of value for biodiversity, open space and recreation.

The majority of new housing development will be focused in the urban areas of Sevenoaks and Swanley.

---

7 See Population and Social Profile available at the evidence base pages of the planning policy and local development framework section of the Sevenoaks District Council website (Sevenoaks.gov.uk)
8 See Employment Land Review available at the evidence base pages of the planning policy and local development framework section of the Sevenoaks District Council website (Sevenoaks.gov.uk)
Sevenoaks will continue to combine economic prosperity with environmental quality and new retail, office, tourism and housing development will support its role as a principal town centre within West Kent. Continued small-scale housing developments will occur on suitable sites throughout the town and a range of job opportunities will be provided generally on existing sites in employment use.

Swanley will be regenerated to create a town centre that better meets the needs of the community and supports the economy through development to include a mix of new shops, offices, hotel and residential development together with accompanying environmental improvements. Existing employment areas in the town will be renewed and a new site developed adjoining the M25. Open space provision will be improved to serve this more densely developed town.

Edenbridge will retain its role as a rural service centre serving the surrounding villages with a range of shops, services and employment.

Within those villages that have a limited range of local facilities and transport options, there will be change on a more limited scale through smaller scale housing developments consistent with the size and relative sustainability of the settlement concerned. There will be an emphasis on retaining existing local services and employment. New Ash Green village centre will be regenerated and the quality of its environment improved so that it more effectively meets the needs of the community.

The countryside outside existing settlements, and outside areas designated as major developed sites within the Green Belt, will continue to be protected and its distinctive character will remain. The separate identity and character of individually distinct villages and towns will be maintained. Small scale affordable housing schemes adjoining existing villages will be developed to meet identified local need. An active and vibrant rural economy providing a range of jobs and services in rural areas will be supported primarily based on the re-use of existing buildings.

The existing major developed sites within the Green Belt will remain and further development within them may occur consistent with their status.

The Kent Downs and High Weald Areas of Outstanding Natural Beauty are of national importance and the distinctive character of their landscapes will be conserved and enhanced. The biodiversity of the District will be conserved and opportunities taken for enhancement in urban and rural areas.

3.4 Strategic Objectives and Delivery

3.4.1 To deliver the vision and address the key issues facing the District, a series of spatial strategic objectives have been developed. These set the framework for policy development and are listed below with a link to the most relevant key issues to which they respond:

Location of Development (Key Issues 1 and 2)

To focus the majority of new housing, employment and retail development in the towns of Sevenoaks and Swanley and, to a lesser extent, in Edenbridge with smaller scale development in the larger villages which have a more limited range of local facilities.

To safeguard the countryside around the District’s towns and villages and promote change within them by making the best use of previously developed land.
3. The Spatial Vision

In Sevenoaks (Key Issue 4)

To meet housing and employment requirements within the existing urban area of Sevenoaks primarily on brownfield sites no longer required for their present use, particularly in areas close to the town centre and the mainline railway station.

To increase the average density of housing development in areas of Sevenoaks with good access to the town centre and main line railway station through well designed schemes which do not compromise the distinct character of the local environment.

To sustain the role of Sevenoaks town centre and its continued vitality and viability whilst maintaining and enhancing the quality of the environment of the town centre area.

To retain the number of job opportunities on regenerated and redeveloped employment sites within the town and provide well designed modern premises

In Swanley (Key Issue 5)

To regenerate and transform Swanley town centre with a high quality new shopping, business and housing hub with an improved environment and public spaces.

To regenerate existing employment areas within the town and provide additional opportunities for new jobs in well designed modern premises.

To improve the town’s open space provision.

In Edenbridge (Key Issue 6)

To retain the role of Edenbridge as a rural service centre with a successful town centre and regenerated employment sites avoiding development in areas of the town liable to flood.

In Rural Areas (Key Issue 6)

To support new housing in local service centres and service villages of a design, scale, character and tenure appropriate to the settlement and support the provision and retention of services and facilities that meet a local need and existing employment opportunities.

To safeguard and maintain the openness of the Green Belt and the distinctive character and biodiversity of the district’s landscapes, particularly in the Kent Downs and High Weald Areas of Outstanding Natural Beauty, whilst facilitating the economic and social well-being of these areas including the diversification of the rural economy by adopting a positive approach to small scale economic development proposals which re-use existing buildings.

Across the District

To ensure that a new development is designed to a high quality and where possible makes a positive contribution to the distinctive character of the area in which it is situated. (Key Issue 3)

To ensure that the District’s historic heritage is protected. (Key Issue 3)

To ensure that new development takes account of the need to mitigate and adapt to climate change including principles of sustainable development, including locating development to minimise energy use, promoting travel patterns that reduce the need to travel by car, and encouraging sustainable construction including measures to reduce energy consumption and promote the use of renewable energy. (Key Issue 11)
To ensure new development takes place in a way that contributes to an improvement in the District’s air quality. (Key Issue 11)

To increase the proportion of affordable housing in new development in response to the level of local housing need from those unable to rent or buy in the open market. To make specific provision for small scale affordable housing schemes to meet identified local needs in rural areas. (Key Issue 7)

To ensure that the form of future provision for housing meets the changing needs of the District’s population, including provision for a greater proportion of older people and small households, and meets the needs of the Gypsy and Traveller Community. (Key Issue 8)

To make efficient use of urban land for housing, with higher density development focused on the most accessible locations in and adjoining town centres, through well-designed schemes that do not compromise the distinct character of the local environment. (Key Issues 2 and 3)

To provide land for employment development to support the future development of the District’s economy. (Key Issue 9)

To ensure that any infrastructure and service improvements needed to support delivery of Core Strategy objectives and policies or resolve existing deficiencies are brought forward in a co-ordinated and timely manner and that new development makes an appropriate contribution towards any improvements required as a result of new development. (Key Issue 10)

To safeguard existing open spaces, sport and recreational facilities that meet community needs and improve provision where necessary. (Key Issue 10)

To maintain and enhance the biodiversity of the District including provision of a network of habitat corridors as part of the Green Infrastructure Network. (Key Issue 3)

Delivery Strategy

3.4.2 The vision and objectives are delivered through the policies and related delivery mechanisms listed for each policy. The location policies deal with the scale, location and timing of future development and include specific policies for the towns and villages in the District for the rural areas, while the strategic policies apply across the District and regulate how development takes place to ensure it contributes to achieving the spatial vision.

3.4.3 For each policy there is a delivery section outlining how it will be implemented. Performance indicators are also listed, which are the measures that will be used to monitor how the policy is working. For some policies there are also targets, which cover critical measures of success for the plan as a whole. The Annual Monitoring Report will report on progress against performance indicators and targets and recommend actions where necessary to keep the plan on track.
The Sevenoaks District Strategy for Transport

The Transport Strategy has been prepared in parallel with the Core Strategy drawing on the same evidence. It takes account of the Core Strategy vision and its proposals are based on the level and distribution of development in the Core Strategy. At the time of writing it is being revised following consultation and it is anticipated that the final version will include the key elements outlined below:

The Transport Strategy identifies four priority objectives, which are:

- Improving accessibility
- Tackling congestion
- Providing safer roads; and
- Improving air quality

These have been used to identify priorities in different parts of the District:

### Sevenoaks Urban Area

- Improve public transport interchange facilities, in particular at the main bus and train stations in Sevenoaks District.
- Maintain and improve capacity on peak train services.
- Manage parking issues in the town centre and around train stations.
- Bring forward measures to alleviate congestion and tackle air quality issues at Riverhead, Bat and Ball and Sevenoaks Town Centre.
- Improve facilities for walking and cycling.

### Swanley

- Improve accessibility to Swanley Station by walking and cycling.
- Ensure that development in Swanley does not have a significant negative impact on traffic on the Strategic Road Network.
- Improve bus interchange facilities in Swanley.
- Improve facilities for walking and cycling.
- Bring forward measures to alleviate congestion and tackle air quality issues near Swanley town centre.

### Edenbridge

- Maintain and improve capacity on peak train services.
- Increasing the number of destinations that can be accessed via train services from Edenbridge, including services to Gatwick Airport / improved services to Redhill.
- Improve facilities for walking and cycling.
- Maintain and, where necessary, improve safety on main access roads to Edenbridge.

### Villages and Rural Areas

- Maintain and improve accessibility to jobs, shops and services by non-car means, including walking, cycling, public transport and community transport.
- Bring forward measures to alleviate congestion and tackle air quality issues, including those along the A25 corridor, at Seal and Westerham, and on the Strategic Network.

4. Location Policies
4.1 The General Distribution of Development

4.1.1 The District must evolve to accommodate the new development required to meet the changing housing needs of the population, support the local economy and develop services and facilities needed to support the local community.

4.1.2 The distribution of development is consistent with national planning policy and in general conformity with regional policy. It concentrates development on the District’s main towns, which have the greatest range of services and facilities to support the population and an approach that is consistent with the urban focus of the South East Plan policy SP3.

4.1.3 The Green Belt which covers the rural areas of the District aims to check the unrestricted sprawl of large built-up areas, to preserve the setting and special character of historic towns and assist in safeguarding the countryside from encroachment. These objectives are particularly important in view of the extensive area covered by Areas of Outstanding Natural Beauty. The prime consideration in such areas is the conservation of the natural beauty of the landscape.

4.1.4 The Green Belt is also aimed at assisting urban regeneration, by encouraging the recycling of derelict and other urban land. This is particularly important at Swanley town centre and to realise the potential within Sevenoaks town centre and adjoining areas.

4.1.5 It also remains the Government’s priority to locate development on previously developed land and for the reasons set out above it is particularly important to meet this challenge in the District where there are significant constraints on the development of greenfield land.

4.1.6 Development within the built up areas must be achieved in the most sustainable towns and villages where employment, key services and facilities and a range of transport options are available. The distribution of development takes account of the Settlement Hierarchy, \(^\text{10}\) which is based on a systematic assessment of such factors for settlements in the District. In summary this is as follows:

<table>
<thead>
<tr>
<th>Settlement Type</th>
<th>Settlements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Principal town</td>
<td>Sevenoaks</td>
</tr>
<tr>
<td>Secondary town</td>
<td>Swanley</td>
</tr>
<tr>
<td>Rural Service Centre</td>
<td>Edenbridge</td>
</tr>
<tr>
<td>Local Service Centres</td>
<td>New Ash Green, Otford and Westerham</td>
</tr>
<tr>
<td>Service Villages</td>
<td>Villages listed in Policy LO7</td>
</tr>
</tbody>
</table>

4.1.7 The District has in the past been able to meet development requirements without the loss of Green Belt and the challenge is to establish a distribution of development that can be satisfactorily accommodated within the most sustainable settlements without undermining the Green Belt. The distribution strategy therefore takes account of the findings of the technical studies, particularly their findings regarding the ability to accommodate future development requirements in existing settlements.

4.1.8 The distribution of development also needs to avoid areas liable to flood. The Strategic Flood Risk Assessment shows that flooding from rivers is not a significant factor in most of the main settlements, except for part of Edenbridge. The housing land availability assessment has treated flooding as a constraint in accordance with Government guidance.

\(^{10}\) Available at the evidence base pages of the planning policy and local development framework section of the Sevenoaks District Council website (Sevenoaks.gov.uk)
Housing Land Supply

4.1.9 The Council has carried out a Strategic Housing Land Availability Assessment (SHLAA) that has been updated to 1 April 2009. The updated assessment shows that the housing provision figure of 3,300 dwellings (2006-2026) for the District can be met from within existing built up areas, enabling the Green Belt to continue to be protected. The main categories of supply are as follows:

<table>
<thead>
<tr>
<th>Supply Category</th>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Completions (since 2006)</td>
<td>692</td>
</tr>
<tr>
<td>Outstanding Permissions (1)</td>
<td>1,366</td>
</tr>
<tr>
<td>Potential Allocations (2)</td>
<td>978</td>
</tr>
<tr>
<td>Small Site Allowance (after first ten years only) (3)</td>
<td>525</td>
</tr>
<tr>
<td>Total</td>
<td>3,561</td>
</tr>
<tr>
<td>Core Strategy Housing Provision (20 years @ 165 per annum)</td>
<td>3,300</td>
</tr>
</tbody>
</table>

Notes

1. After a deduction has been made to allow for a non implementation rate based on past trends. Outline planning permissions are included in this total following assessment in the SHLAA
2. Based on sites assessed in the SHLAA
3. 75 dwellings per annum based on past trends. Small sites are less than 0.2 ha.

4.1.10 The figures show a surplus of 261 dwellings in relation to the District’s housing provision. This is a comparatively robust supply because a high proportion (62% of the requirement) is made up of development already built or with planning permission. Assuming these elements are built, and a discount has already been applied to the outstanding planning permissions total, then the remaining elements of the supply (potential allocations and small site allowance) exceed the total needed to meet the District’s housing provision by 21%.

4.1.11 The Housing Trajectory based on the figures is presented at Appendix 1. The trajectory shows that the identified supply exceeds the requirement by the greatest extent over the first ten years. In this period, where the supply is made up of identified deliverable and developable sites, the District provision, based on the annual figure is exceeded by 891 units (or 40%).

4.1.12 There are other sources of supply that the Council will take into account in monitoring and managing the housing supply over the Core Strategy period. Development from these sources will be monitored as part of the Annual Monitoring Report and added to the housing land supply. These are:

1. Small sites in the first ten years. In accordance with Government guidance the supply does not include a figure for small sites in this period beyond outstanding permissions. However, past trends suggest that small site windfalls are a significant contributor to housing completions and the SHLAA concludes that this will continue in the future. Actual completions from small site windfalls will count towards meeting the housing target once development is completed.

2. Affordable housing “exception sites” developed under Policy SP4, which cannot be counted as contributing to the housing land supply until after completion.

3. Redevelopment of business sites in urban areas for mixed use which may be permitted under Policy SP8.
4. Large windfall sites beyond the first ten years. The SHLAA seeks to identify large sites for development during the Core Strategy period. However, identifying in advance sites for development more than ten years into the future is difficult, particularly redevelopment sites in urban areas. It is noteworthy that all the urban sites put forward in response to the SHLAA “call for sites” were identified by their promoters for development in the first ten years. In the longer term the SHLAA will be updated to identify the emergence of potential new urban housing land.

5. Reserve Land. Land at Edenbridge, formerly safeguarded to meet long term development needs, is re-designated as Reserve Land in Policy LO6 so that it is available to be brought forward for development during the Core Strategy period if required.

6. Development of areas of opportunity in Sevenoaks town centre under Policy LO3 which may include scope for some housing as part of mixed use development.

7. Any additional contribution from safeguarded land at Westerham.

4.1.13 The distribution of housing based on the identified supply is shown in Table 2. The greatest capacity for housing development is identified in Sevenoaks urban area, followed by Swanley, Edenbridge and a range of smaller settlements, which is consistent with focusing development primarily on settlements with the widest range of facilities. Most of the housing total for the smaller settlements consists of either completions or commitments in the form of planning permissions.

4.1.14 The distribution is weighted slightly more towards the Rest of Kent than the London Fringe sub region when compared with the distribution based on the South East Plan (98/80 dwellings per annum in favour of the Rest of Kent compared to 80/85 dwellings per annum in the South East Plan, see para 3.2.2 for further information on the sub regions). Most of the District lies outside the London Fringe area, including some parts adjoining London. Some flexibility in the distribution is considered justified for the following reasons:

1. The District’s overall requirement is exceeded;

2. The distribution is based on the South East Plan strategy of an urban focus and only one of the District’s three main towns (Sevenoaks) is in the London Fringe;

3. The defined boundary of the London Fringe only just excludes the other two main towns Swanley and Edenbridge. Swanley in particular is a location that is consistent with the characteristics of the London Fringe adjoining London and the M25. It has significant urban land available for housing; and

4. The small London Fringe shortfall (5 dwellings per annum over the Core Strategy period) is likely to be made up from the first four sources of supply identified above.

Employment Land and Retail Development

4.1.15 The Employment Land Review shows that future employment land needs can be met largely within existing employment sites provided the great majority of these sites are retained in employment use. The distribution of employment land is based on existing development and is therefore principally at Sevenoaks, Swanley and Edenbridge, including a previously undeveloped site at Swanley. Other significant contributions come from the Major Developed Sites in the Green Belt. The distribution is shown in Table 2.

4.1.16 The Retail Study update shows that, based on forecast future expenditure, there is limited capacity for further development in Sevenoaks, primarily later in the plan period. In Swanley there will be little capacity based on expenditure growth but scope for new development to claw back some
of the trade currently lost to other locations. In other centres the emphasis will be on maintaining provision to meet local needs. In accordance with Government policy retail development will continue to be focused on existing town centres.

**Green Belt**

4.1.17 The Core Strategy establishes there is no need to amend the Green Belt to meet development needs. The case for any small scale adjustments to cater for situations where land no longer contributes to the Green Belt can be considered through the Allocations and Development Management DPD.

Table 2: Summary of Broad Housing and Employment Land Provision (2006-2026)

</tr>
</tbody>
</table>

Note

1. Employment land figures exclude Major Developed Sites in the Green Belt.
2. The Sevenoaks urban area includes Sevenoaks town, Riverhead, Dunton Green, Chipstead and Bessels Green.
3. The Edenbridge housing figure excludes any contribution from the Reserve Land

### Policy LO 1

**Distribution of Development**

Development will be focused within the built confines of existing settlements.

The Sevenoaks urban area, which includes Sevenoaks town, Riverhead, Dunton Green, Chipstead and Bessels Green, will be the principal focus for development in the District in accordance with Policies LO2 and LO3.

Swanley will be the secondary focus for development with the emphasis on maintaining and enhancing its role and promoting regeneration to meet the needs of the local community in accordance with Policies LO4 and LO5.

Edenbridge will be a location for development of a scale and nature consistent with the needs of the town and the surrounding rural area it serves in accordance with Policy LO6.

New Ash Green, Otford and Westerham will be locations for limited development in accordance with Policy LO7.
4. Location Policies

The Service Villages, listed in Policy LO7 will be locations for small scale development consistent with the requirements of Policy LO7.

In other locations priority will be given to protecting the rural character of the District. Development will only take place where it is compatible with policies for protecting the Green Belt and the High Weald and Kent Downs Areas of Outstanding Natural Beauty, where relevant. Development will be located to avoid areas at risk of flooding.

Delivery Mechanisms:

Policies LO2 to LO7 set out development proposals consistent with the general distribution of development in Policy LO1.

The Annual Monitoring Report will monitor progress in delivering housing against the housing trajectory and ensure the maintenance of a five year rolling supply of deliverable housing sites in accordance with Government guidance in PPS3 (Housing).

The Allocations DPD will include identified housing sites, consistent with the Core Strategy, anticipated phasing and implementation requirements.

Performance Indicators:

Actual housing development compared to the housing trajectory

Actual distribution of housing development compared to the distribution in the Core Strategy

Housing development in areas liable to flood

Targets:

An average completion rate of 165 dwellings per annum to be maintained over the Core Strategy period

From the date of adoption at least two thirds of new housing to be in Sevenoaks, Swanley and Edenbridge and at least half to be in Sevenoaks and Swanley.

No housing development to be permitted in areas liable to flood where contrary to Environment Agency recommendations.

4.2 Development in Sevenoaks Urban Area

4.2.1 The urban area that includes Sevenoaks town also extends to cover Riverhead, Dunton Green, Bessels Green and Chipstead and is the largest in the District. (See Figure 3). This section relates to the whole urban area although the scope for development will be more limited in the smaller communities.
4.2.2 In a regional context the South East Plan shows Sevenoaks as a “Secondary Regional Centre”, reflecting its significance, but also reflecting the fact that there are other larger centres elsewhere in the region, including those that, unlike Sevenoaks, are specifically identified for significant change.

4.2.3 In the context of the District the relative accessibility of the urban area and range of services available means that it is a sustainable location for development and the technical studies suggest there is scope for development in the existing urban area. But its character varies greatly and development needs to take place in a way that does not harm high quality environments or undermine the distinctive character of different parts of the urban area.

4.2.4 Sevenoaks is surrounded by Green Belt, which preserves the setting and special character of the historic town, constrains the expansion of the town and safeguards the countryside from encroachment. It also maintains the separation of the urban area from nearby settlements, including Otford and Seal, retaining their separate identity. In addition it includes significant green wedges that help to break up the extent of built development and contribute to maintaining the separate character of individual communities that form part of the urban area, including Riverhead, Dunton Green, Bessels Green and Chipstead. Much of the open land adjoining the town is designated as AONB and flooding is also a significant constraint on land to the north. In view of these constraints and the scope for development in the built up area the option of releasing any Green Belt land adjoining the urban area for development has been rejected.

4.2.5 Provision for new development in the urban area is summarised in Table 3.

4.2.6 Housing provision is based on the findings of the Strategic Housing Land Availability Assessment, including outstanding permissions, sites identified in the urban area and a small site allowance after the first ten years. It is made up as follows:

<table>
<thead>
<tr>
<th>Description</th>
<th>Quantity</th>
</tr>
</thead>
<tbody>
<tr>
<td>Completions since 2006</td>
<td>119</td>
</tr>
<tr>
<td>Outstanding permissions</td>
<td>743</td>
</tr>
<tr>
<td>(of which outline)</td>
<td>510</td>
</tr>
<tr>
<td>Identified sites</td>
<td>329</td>
</tr>
<tr>
<td>Small site allowance</td>
<td>140</td>
</tr>
<tr>
<td>Total</td>
<td>1,331</td>
</tr>
</tbody>
</table>

4.2.7 Over 60% of the housing provision is made up of completions and outstanding planning permissions. The largest single component is an outline permission for a phased development of 500 units at West Kent Cold Store close to Dunton Green railway station.

4.2.8 The most accessible parts of the urban area are those within easy walking distance (800m) of the town centre and main railway station. Subject to designs being appropriate to the area higher density development will be suitable in these areas, enabling more people to live in locations closest to services and facilities. Policy on density of residential development is contained in Policy SP7.
Figure 3: Sevenoaks Urban Area
4.2.9 Sites will be brought forward for housing development to enable the provision to be met through the Allocations and Development Management DPD. Past trends and the Strategic Housing Land Availability Assessment illustrate that small sites make a significant contribution to housing provision within the town. This is to be expected given the relatively large size and the character of the urban area. Small site development allows for the sensitive integration of development into the distinctive character of the town and such opportunities will continue to arise.

4.2.10 The Strategic Housing Land Availability Assessment included an assessment of “character areas” in the town. This identified the distinctive features that contributed positively to the character of different parts of the town and used this assessment to identify which areas had potential for further development to take place in a sensitive way without harm to their overall character. The assessment will be developed into a supplementary planning document to assist in considering development proposals in the town.

4.2.11 Sevenoaks has a significant stock of employment land. The Employment Land Review identified a range of sites that it considered suitable for retention in employment use. Policy SP8 will apply to these areas and employment sites for retention will be designated through the Allocations and Development Management DPD. Modernisation and redevelopment of existing employment sites will be encouraged in accordance with the policy to ensure that employment land continues to adapt to meet the needs of the town’s economy.

4.2.12 Retail development will remain focused primarily on the town centre. In view of Government guidance and the findings of the Retail Study (2009 Update), which concludes there is only a limited need for growth that can be accommodated in the town centre, it is not proposed to add to out of centre provision.

4.2.13 There are several neighbourhood shopping centres within the urban area that have a role in offering convenience shopping for their local communities. The extent of these and policy on change of use within them will be set out in the Allocations and Development Management DPD.

Table 3: Summary of Development Provision in Sevenoaks Urban Area

<table>

</tbody>
</table>

Notes

1. Future housing completions are rounded to the nearest ten.
2. Area in hectares to be retained/regenerated
3. Of the total retail floorspace provision approximately 2,300 sq m is comparison (non food) and 1,700 sq m convenience floorspace.
4.2.14 Proposals for improving transport provision, consistent with the Core Strategy, to reduce reliance on the car will be developed through the Transport Strategy. This will include improved provision for cyclists, including dedicated cycle routes and improved cycle parking and improved provision for public transport users.

4.2.15 Sevenoaks is an important centre for commuting to London based primarily on the fast and frequent services from the main train station. This role will continue and the Council will support improvements to the station and interchange facilities to improve the experience for commuters. Improvements to car parking provision for the station will be supported subject to evidence of demand and environmental acceptability.

**Policy LO 2**

**Development in Sevenoaks Urban Area**

In Sevenoaks provision will be made for approximately 1,330 dwellings (2006-2026) on a range of sites suitable for residential use within the urban area.

Existing suitable employment sites will be retained with the opportunity for regeneration and redevelopment to better meet the needs of business.

In bringing forward sites for development the emphasis in this area will be on:

- the town centre as shown on Figure 4
- housing development at locations throughout the town suitable for housing development and with particular emphasis on locations within the town centre, or within easy walking distance of the town centre or main line railway stations.
- employment development in existing employment areas; and
- protection of the setting of the urban area and the distinctive character of the local environment and also respecting the physical and community identity of the adjoining settlements, and prevention of further coalescence.

**Delivery Mechanisms**

The Allocations and Development Management DPD will allocate sites for residential development consistent with the Core Strategy.

The Allocations and Development Management DPD will define the boundaries of employment sites to be retained.

The Residential Character Areas SPD will give guidance on achieving high quality development that responds to the distinctive local character of the residential areas of the town.

**Performance Indicators:**

Actual distribution of housing development compared to the distribution in the Core Strategy.

Net change in employment floorspace in the town.
Target

From the date of adoption at least two thirds of new housing to be in Sevenoaks, Swanley and Edenbridge and at least half to be in Sevenoaks and Swanley

Sevenoaks Town Centre

4.2.16 Sevenoaks has a successful town centre although it faces competition from other larger centres outside the District and, in common with other town centres has suffered from an increase in vacant premises due to the recession. It has benefited from the completion of the Bligh’s Meadow development in 2007 and has a good range of independent shops and services and multiple stores but not the range of department stores associated with larger centres.

4.2.17 The town centre benefits from a high quality environment that needs to be maintained and enhanced as it continues to develop.

4.2.18 The Retail Study (2009 Update) shows that further growth will be needed over time if the town is to maintain its position relative to other centres. It concludes that there will be expenditure growth to support approximately 1,700 sq m net of additional convenience floorspace spread over the plan period and 2,300 sq m net of comparison (non food) floorspace primarily during the period after 2019, giving a total of 4,000 sq m net. In view of the uncertainty associated with long term forecasts of retail demand including internet sales, trends in retail expenditure will be monitored and the implications for the scale of long term growth in shopping in the town centre kept under review.

4.2.19 The broad extent of the town centre is shown on Figure 4. The town centre boundary is based on the existing shopping area, and land in related uses, including car parks and employment land. There is scope for further development in this area and the Council does not see a need for the town centre to expand into adjoining areas that are purely residential in character. The primary focus for new development will be on the areas described below that are shown diagrammatically.

1. West of Bligh’s Meadow on the north western side of the town centre. A mixed use development is proposed including residential flats, commercial, retail and café/restaurant use, together with the relocated market. The town centre commercial uses will adjoin the Bligh’s Meadow car park and complement the existing shopping provision. The development will bring more residential development into the town centre and improve the appearance of a relatively unattractive part of the centre. The scheme offers a range of benefits and will be brought forward early in the plan period.

2. East of the High Street adjoining Buckhurst Way. This area primarily contains surface parking and service yards. Most of the land is Council-owned and offers scope for retail development of at least the scale envisaged in the Retail Study together with related town centre uses closely linked to the High Street. Redevelopment would need to provide for replacement decked car parking. In accordance with the findings of the Retail Study this is a longer term opportunity proposed for development later in the Core Strategy period after 2019, although there could be scope to develop earlier if justified by demand. Proposals will be included in the Allocations and Development Management DPD with a Planning Brief to be prepared at a later date to lead the development of detailed proposals.
Policy LO 3

Development in Sevenoaks Town Centre

A mix of uses (including retail, offices, cultural, leisure, hotel and residential development) will be retained and enhanced within the town centre. The historic form and character of the town centre will be maintained.

Approximately 4,000 sq. metres net of new shopping floorspace (including approximately 1,700 sq m of convenience and 2,300 sq m of comparison floorspace) will be provided in the town centre up to 2026. This will include redevelopment of land west of Blighs Meadow for a mix of uses including residential, commercial and retail and in the longer term redevelopment of land east of the High Street for retail and related uses.
New development in the town centre should be of a scale consistent with the existing character of the centre and should contribute to improving the quality of the town centre environment.

Town centre car parking will be managed to ensure adequate and convenient provision for shoppers and appropriate provision for long stay parking.

**Delivery Mechanisms:**

The Allocations and Development Management DPD will include proposals for individual developments consistent with the policy. The Council will work with developers to bring forward identified proposals using its planning powers where necessary.

A Planning Brief will be prepared for Land West of Bligh’s Meadow.

A Planning Brief for land east of the High Street will be brought forward in time to lead the development of detailed proposals.

The Council will work with local businesses to manage the town centre and promote environmental improvements. It will seek environmental improvements in association with new development.

**Performance Indicators:**

Progress in developing town centre sites

Net change in retail floorspace

Performance against town centre health check indicators

**Target:**

Approximately 4,000 sq m net of additional retail floorspace to be provided in Sevenoaks town centre by 2026.

---

4.3 Development in Swanley

4.3.1 Swanley is the second largest town in the District. It is accessibly located adjacent to Junction 3 of the M25 but does not have as wide a range of services as Sevenoaks. Taking these factors into account it is placed second in the settlement hierarchy. New development will primarily meet the needs of the town and its surrounding area and contribute to maintaining and enhancing its role.

4.3.2 Parts of Swanley suffer from relatively high levels of deprivation and some areas of poor environment. The Council is working with other agencies to achieve effective regeneration. The Local Strategic Partnership, co-ordinated by the Council, brings together a wide range of organisations with an interest in regeneration to develop initiatives within the framework of the Community Strategy. The Council has established the Swanley People First Partnership to deliver a Single Regeneration Budget programme, which led to some £1.64 million pounds of expenditure over the SRB period from 2001-5 and has continued the partnership to progress ongoing initiatives established under the SRB and develop new opportunities. The objectives of the Swanley People First Partnership are to:
4. Encourage participation and improve opportunities for excluded residents.

- Improve skills levels and educational attainment.
- Improve access to employment opportunities.
- Develop alternative activities to promote community safety.

4.3.3 14 separate projects were established that contribute to achieving the objectives. These covered a wide range of activities and have directly involved over 6,500 local residents. When the SRB funding came to an end, many of the projects were continued in some form.

4.3.4 New development in the town promoted through the Core Strategy will complement the regeneration initiatives being pursued through Swanley People First by providing new job opportunities, improved facilities in the town centre and environmental improvements. The Strategic Housing Land Availability Assessment identifies significant redevelopment opportunities in the town. In addition new development in the town will contribute to a community fund to support local regeneration projects (see the Infrastructure Delivery Plan Schedule in Appendix 4 for further details).

4.3.5 Swanley is surrounded by Green Belt land. Land to the south east is also within the AONB which should be safeguarded from encroachment, while to the north and north east the Green Belt plays an important role in separating Swanley from the nearby communities of Hextable and Swanley Village and to the south in separating Swanley from Crockenhill. The Green Belt can play a significant role in assisting regeneration by focusing investment on existing urban land. For these reasons there are no proposals to release Green Belt land around Swanley.

4.3.6 Provision for new development in the town is summarised in Table 4.

4.3.7 Housing provision is based on the findings of the Strategic Housing Land Availability Assessment, including outstanding permissions and sites identified in the urban area and is made up as follows:

<table>
<thead>
<tr>
<th>Description</th>
<th>Number</th>
</tr>
</thead>
<tbody>
<tr>
<td>Completions since 2006</td>
<td>38</td>
</tr>
<tr>
<td>Outstanding permissions</td>
<td>65</td>

<tr>
<td>Identified sites</td>
<td>494</td>
</tr>
<tr>
<td>Small site allowance</td>
<td>63</td>
</tr>
<tr>
<td>Total</td>
<td>660</td>
</tr>
</tbody>
</table>

4.3.8 Most of the provision consists of identified sites. These sites will be brought forward for housing development through the Allocations and Development Management DPD.

4.3.9 Policy on the density of residential development in the town is contained in Policy SP7.

4.3.10 Swanley has a significant stock of employment land and its retention and modernisation in accordance with Policy SP8 will be a key factor in the development of the local economy. The economy has the potential to benefit further from the town’s location next to the M25 and, in addition to existing sites, an unimplemented Sevenoaks District Local Plan allocation for employment land at Broom Hill adjoining Junction 3, is proposed to be retained as it continues to have potential for economic development to support the economic regeneration of the town.

4.3.11 The development of a hotel in the town offers potential benefits for the local economy and will be supported. Planning permission has now been granted for a hotel on the western side of the town.

4.3.12 Swanley’s position adjacent to the M25 and A20 means that traffic-generating development in the town has the potential to affect the Strategic Road Network (SRN). The Council has undertaken an assessment (based on the Highways Agency’s suggested Reduced Transport Evaluation methodology) of the impact of development in Swanley on the SRN. The assessment estimates that the cumulative impact of residential development in Swanley, beyond existing commitments, and development of an industrial estate form of employment use on the Broom Hill site was likely to be relatively modest. However, the assessment suggested that, without mitigation, development of a business park form of development at Broom Hill may have a more significant impact on traffic levels on the SRN. These broad conclusions from the assessment have been agreed with the Highways Agency.

4.3.13 The development of the Broom Hill site is important to the economy of the town. Its potential traffic impact will be mitigated by:

- Limiting the development to industrial estate type uses (B1(c), B2, B8) unless a developer is able to demonstrate, to the satisfaction of the Council and the highways authority, that the development of other types of commercial floorspace will not have a significant impact on traffic levels on the Strategic Road Network.
- Requiring the development to implement a Travel Plan that may provide an improved bus link between Swanley Town Centre, Swanley Station and the east of Swanley, to serve the Broom Hill site and other employment sites in the area and limit the number of parking spaces to a level significantly below the maximum standard.
- Requiring applications to be accompanied by a Transport Assessment and Travel Plan that incorporate proposals to mitigate impact.
- The development of the site is subject to confirmation by means of a transport assessment that the transport impact on M25 Junction 3, taking account of mitigation measures, is acceptable.

4.3.14 Development will also need to minimise impact on Biodiversity Action Plan habitats and include biodiversity enhancements. Proposals for the site having regard to these considerations will be set out in the Allocations and Development Management DPD.
4.3.15 Elsewhere in Swanley the Council will:

- Secure an improved walking and cycling link between the town centre and Swanley Station.
- Investigate the potential of developing a bus station in Swanley.
- In conjunction with the County Council improve cycleway and footpath provision in the town through the Transport Strategy and require facilities for cyclists to be provided in new development.
- Require all developments of 20 dwellings or more to be accompanied by a Travel Plan, which would set out a package of measures to encourage travel to and from the development site by sustainable modes.

4.3.16 Swanley is less well-served with open space than other parts of the District, despite the valuable asset of Swanley Park on the northern side of the town. The Open Spaces Study recommends that provision be improved so that residents, particularly in the southern part of the town, have better access to open space. In accordance with Policy SP10 developments in areas of the town where there is a deficiency will be expected to provide or make a contribution towards improvement.

Policy LO 4

Development in Swanley

In Swanley provision will be made for approximately 660 dwellings (2006-2026) throughout the town on a range of sites suitable for residential use within the urban area.

The local economy will be sustained through the regeneration and redevelopment of existing suitable employment sites to better meet the needs of business and through the allocation of additional land not in the Green Belt for employment purposes adjoining the M25. Developments in Swanley will be accompanied by measures to increase the attractiveness of sustainable transport modes.

In allocating sites for development in the Allocations and Development Management DPD, the emphasis in this area will be on:

- the town centre and adjoining areas
- for employment development, existing employment areas and land adjoining Junction 3 of the M25;
- providing additional public open space where opportunities arise: and
- protecting the setting of the town and the physical and community identity of the adjoining settlements, and prevention of coalescence

Delivery Mechanisms:

The Allocations and Development Management DPD will allocate sites for residential, employment and open space development.

The Allocations and Development Management DPD will define the boundaries of employment sites to be retained.

Planning briefs will be prepared for key sites

Policy SP10 will be used to secure additional open space provision in connection with new development.
A revised planning brief will be prepared for the Broom Hill site which will identify the extent of the site to be developed for employment use, provision for green infrastructure and transport issues, taking account of factors listed in paras 4.3.13 -14.

Performance Indicators:

Actual distribution of housing development compared to the distribution in the Core Strategy Net change in employment floorspace in the town

Target:

At least two thirds of new housing to be in Sevenoaks, Swanley or Edenbridge and at least half to be in Sevenoaks or Swanley

Swanley Town Centre

4.3.17 Swanley town centre contains a large food superstore and a pedestrianised shopping street, together with a civic centre and other facilities. The boundary of the town centre for the purposes of the Core Strategy is shown diagrammatically on Figure 5. It is focused primarily on the pedestrianised shopping area and superstore to the north west of the railway but also includes a limited area to the south east close to the main part of the centre. There is significant scope for development within the area of the centre to achieve regeneration objectives. The Allocations and Development Management DPD will define the boundary of the redevelopment proposals. The expansion of town centre development onto the adjoining open space to the south west will only be acceptable if it is demonstrated through the preparation of detailed proposals to be necessary to ensure the delivery of a regeneration scheme that enhances the vitality and viability of the town centre and meets the requirements of Policy LO5. In such circumstances provision would need to be made for the enhancement of the remaining open space and the off site replacement of equivalent value to the community of any facilities lost.

4.3.18 The shopping centre suffers from a high level of vacancies and a limited range of stores. It loses a significant amount of expenditure to other areas, the environment is in need of improvement and overall it does not serve its local community as well as it should.

4.3.19 The Council has been working with landowners and the local community to promote a regeneration scheme for the town centre with the objective of securing development that enables the centre to better meet the needs of the community. It will continue to work towards achieving such a scheme, although in the current economic climate a comprehensive scheme may not be viable. Pending a more comprehensive development, measures to improve the quality of the environment through refurbishment will be supported.

4.3.20 The regeneration of the centre would help retain expenditure and the economic prosperity of the town, strengthen the social function of the centre as the meeting place of the town and enhance the environment and image of the place. In these ways, the enhancement of the centre can act as a catalyst for enhancing the town.
4.3.21 The town centre would benefit from a hotel development which could assist in regeneration, widen the range of activity in the town centre area and contribute to the town's economy as a whole. If the hotel development permitted on the western side of the town goes ahead the continued case for a hotel development in the town centre will be reviewed through the Allocations and Development Management DPD.

4.3.22 A dedicated pedestrian/cycleway link will be provided between the railway station and the town centre to encourage access to the town centre by public transport.

4.3.23 To the south east of the railway land at Bevan Place provides an opportunity for further town centre housing development.

4.3.24 The Allocations and Development Management DPD will define the precise boundary of the town centre and include a policy on change of use in the shopping frontage.
Policy LO 5

Swanley Town Centre

Swanley town centre will be regenerated so that it better meets the needs of the population it serves. The regeneration scheme will contain a mix of uses including retail, offices, residential and community facilities (including replacement of existing medical facilities) and will bring about a substantial improvement in the environment of the town centre. The provision of a hotel will be supported. Links between the town centre and the station will be improved.

Delivery Mechanisms:

The Allocations and Development Management DPD will contain proposals for individual developments.

The Council will work with partners, including landowners and the local community, to bring forward comprehensive and viable regeneration proposals for the town centre in accordance with the policy. It will seek voluntary agreements to enable development to take place but will use its statutory powers if necessary.

The Council will work with local businesses to manage the town centre and promote environmental improvements. It will seek environmental improvements in association with new development.

The proposed route for the pedestrian/cycleway link to the station will be safeguarded through the Allocations and Development Management DPD. Delivery will be secured through developer contributions from the town centre regeneration, supported by Local Transport Plan funding (if available) (Further details are contained in the Infrastructure Delivery Plan, para 1.8).

Performance Indicators:

Progress in implementing the regeneration scheme

Net change in retail floorspace

Performance against town centre health check indicators

Target:

A town centre regeneration scheme, consistent with the Core Strategy, to be approved within five years and completed within ten years of Core Strategy adoption.

The footpath/cycleway link to the station to be completed no later than the completion of the regeneration scheme.
4.4 Development in Edenbridge

4.4.1 Edenbridge is the third largest town and is the centre for a large rural area in the south west of the District. It expanded in the 1960s when it was designated as an overspill area and has developed along a north-south axis. It is less accessible to the main road network than Sevenoaks or Swanley but has orbital and radial rail links. The town has a range of services although more limited than the two larger towns.

4.4.2 Parts of Edenbridge are liable to flood and these will be avoided in providing for development vulnerable to flooding, including housing.

4.4.3 The Strategic Housing Land Availability Assessment shows that there are significant commitments for new development within the town, including schemes under construction, and further scope from small sites as follows:

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Completions since 2006</td>
<td>207</td>
</tr>
<tr>
<td>Outstanding permissions</td>
<td>127</td>
</tr>
<tr>
<td>Identified sites</td>
<td>7</td>
</tr>
<tr>
<td>Small site allowance</td>
<td>70</td>
</tr>
<tr>
<td><strong>Total</strong></td>
<td><strong>411</strong></td>
</tr>
</tbody>
</table>

4.4.4 Edenbridge is surrounded by Green Belt, which preserves the setting and character of the town, constrains its expansion and safeguards the countryside from encroachment.

4.4.5 Edenbridge does have an area of “Safeguarded Land” west of Enterprise Way on the north-western side of the town that was originally released from the Green Belt in 1990 to meet potential long term development needs (see figure 6). The Strategic Housing Land Availability Assessment, as updated, shows that the District can meet its housing provision without using the safeguarded land. As the Core Strategy gives preference to the development of land within existing built up areas and the housing trajectory shows a substantial surplus in the first half of the plan period, the safeguarded land is not proposed for development at this time. The land does, however, have the potential to contribute to housing provision in the District in the latter part of the Core Strategy period if sufficient development does not come forward to meet the Core Strategy provision. The saved Local Plan policy towards safeguarded land states that such land can only be released through a future review of the development plan which would entail quite a lengthy process to ensure its release should it be needed.

4.4.6 The safeguarded land is therefore being re-designated as Reserve Land to be subject to a Core Strategy policy that will enable it to be brought forward if necessary to ensure an adequate supply of land is maintained to meet the District's housing requirements without the need for a further development plan review. It will not be considered for release before 2015 in view of the adequacy of supply at present. The test for its release will be whether it is needed to maintain a five year housing land supply in accordance with Government requirements. The Annual Monitoring Report will provide the housing supply information on which to base a decision and the release of the land, if required, will be by means of a Council resolution.
Figure 6 - Land at Edenbridge. Area to be changed from safeguarded to reserve
4.4.7 Policy on the density of residential development is contained in Policy SP7.

4.4.8 Edenbridge has lost some employment land to other uses in recent years but still has a significant stock of employment land. The Employment Land Review identified a range of sites that it considered suitable for retention in employment use. Policy SP8 will apply to these areas and employment sites for retention will be designated through the Allocations and Development Management DPD. Regeneration and redevelopment of existing employment sites will be encouraged in accordance with the policy to ensure that employment land continues to adapt to meet the needs of the town’s economy.

4.4.9 Edenbridge town centre provides a range of local shopping serving the town and surrounding area. Environmental improvements have recently been carried out following completion of the relief road. The Retail Study Update suggests there is only limited scope for increasing convenience shopping provision. The emphasis will be on maintaining a consolidated town centre and seeking opportunities for further improvement within the town centre area. The boundary of the town centre will be defined in the Allocations and Development Management DPD and will reflect the completion of the Co-operative food store and the greater focus to the south than the boundary in the Saved Local Plan. The Allocations and Development Management DPD will also include a policy on change of use in the shopping frontage. Opportunities to improve services for visitors will be sought, including a hotel should a proposal come forward on a suitable site.

4.4.10 Provision for development in Edenbridge is summarised in Table 5.

Policy LO 6

Development in Edenbridge

In Edenbridge provision will be made for approximately 410 dwellings (2006-2026) on a range of sites suitable for residential use within the urban area, avoiding areas liable to flood.

Land to the west of Edenbridge previously safeguarded to meet long term development needs is re-allocated as Reserve Land to be brought forward for development after 2015 only if required to maintain a five year supply of housing land in the District.
Existing suitable employment sites will be retained with the opportunity for regeneration and redevelopment to better meet the needs of business.

The mix of retail and service uses that contribute to the vitality and viability of the town centre will be maintained.

Delivery Mechanisms:

The Allocations and Development Management DPD will allocate sites for residential development.

The Allocations and Development Management DPD will define the boundaries of employment sites to be retained.

The Reserve Land will not be considered for release until after 2015. The test for its release after that date is whether the Annual Monitoring Report shows a five year supply of deliverable sites without the inclusion of the Reserve Land.

Performance Indicators:

Actual distribution of housing development compared to the distribution in the Core Strategy

Net change in employment floorspace in the town

Net change in retail floorspace

Performance against town centre health check indicators

Target:

At least two thirds of new housing to be in Sevenoaks, Swanley and Edenbridge and at least half to be in Sevenoaks and Swanley.

4.5 The Rural Areas and Countryside

Development in Rural Settlements

4.5.1 The District contains a range of smaller settlements that have a more limited range of services than the main towns but still offer some services to meet the day-to-day needs of their communities. The overall amount of development that will be acceptable in these settlements will generally be less than in the main towns due to their more limited range of services and reduced accessibility, which renders them less sustainable locations for meeting the development needs of the District as a whole. In addition the smaller size of the settlements will mean that the physical scope for larger scale development consistent with maintaining their character and protecting the Green Belt and Areas of Outstanding Natural Beauty will be less.

4.5.2 A systematic assessment of services and facilities available in each settlement in the District forms the basis for the Settlement Hierarchy. Below Sevenoaks, Swanley and Edenbridge the following categories are defined:

Local Service Centres. New Ash Green, Otford and Westerham.
4.5.3 Some modest development would be acceptable within these settlements subject to local environmental considerations.

4.5.4 New Ash Green was developed as a new community in the 1960s with its own centre. The centre has proved to be less successful than other aspects of the development and has suffered from vacant units and environmental problems. The Council is attempting to work with landowners and the local community to develop proposals for its regeneration so that it better meets the needs of the local community, while retaining a scale appropriate to the size of the community it is intended to serve and a form that respects the distinctive character of the settlement. An element of residential development will be included as part of the regeneration scheme. The final form of development will follow local consultation. No significant scope for development exists elsewhere in the village outside the centre.

4.5.5 In Otford local environmental factors, including significant areas of open space, limit the scope for further development. The future emphasis is likely to be primarily on small sites.

4.5.6 Westerham has the widest range of facilities in this category. The housing land availability assessment has not identified any large sites for future housing development within the settlement confines but Westerham does have land safeguarded for long term development. This consists of three relatively small sites, with a combined area of 4 ha:

1. Land adjoining Croft Road.
2. The former school site to the east of the allotments.
3. Allotments adjoining Churchill School.

4.5.7 In view of the size of these sites the Council considers that they only have a limited value for continued safeguarding as a strategic long term reserve for the District after 2026. Instead their future will be considered through the Allocations and Development Management DPD which will examine the scope for development to take place without harm to the AONB and, in the case of the allotments site, maintaining provision for allotments in accordance with Policy SP10. The identified supply includes the former school site which is previously developed land.

4.5.8 These villages have a limited range of basic services. They all have defined Green Belt boundaries but have restricted scope for further development within their settlement confines. They will only be suitable as locations for small scale development, limited to infilling and redevelopment, where the scale and nature of development is consistent with the local village character.

Smaller Villages and Hamlets

4.5.9 The remaining settlements have a very restricted range of services which render them unsuitable locations for promoting development. A few areas are sufficiently built up to justify a defined Green Belt boundary but, in view of the lack of facilities, development in these locations will be limited to small scale infilling only.

4.5.10 The land availability assessment shows there is significant scope for housing in these settlements although the supply is spread over a wide area and no single settlement has identified capacity for development on a substantial scale. The supply consists primarily of existing commitments although a number of relatively small additional sites have been identified. It is shown below:
Completions since 2006 328  
Outstanding permissions 431  
Identified sites 148  
Small site allowance 252  
Total 1,159  

4.5.11 Two thirds of the housing provision is made up of completions and outstanding planning permissions.

4.5.12 Across the settlements there is some employment land recommended for retention through the Employment Land Review. This generally consists of relatively small sites and their retention and regeneration consistent with Policy SP8 will enable them to continue to make a significant contribution to the rural economy.

Notes

1. Future housing completions are rounded to the nearest ten and exclude Reserve Land.
2. Area in hectares to be retained/regenerated

4.5.13 The boundaries of village centres where these exist and detailed policies controlling change of use in these areas will be set out in the Allocations and Development Management DPD.

4.5.14 The continued sustainability of the local service centres as places to live and work is dependent on the retention of local services that meet community needs coupled with the retention of adequate transport services enabling access to larger centres for those services that are not available locally. The Council will work with service providers to support the retention and where possible improvement of rural transport services that provide an essential link between rural towns and villages and larger towns and will continue to provide its own community transport services to rural areas. The Council will seek to ensure that the policies of the Local Transport Authority maintain and improve the accessibility of rural communities through:

1. taking a co-ordinated approach to encouraging community-based transport in areas of need.
2. including a rural dimension to transport and traffic management policies, including looking for opportunities to improve provision for cyclists and pedestrians between towns and their nearest villages.
3. developing innovative and adaptable approaches to public transport in rural areas that reflect the particular and longer term social and economic characteristics of the District.

4.5.15 The Council will seek to retain local services through the application of planning policy and will work positively to support proposals to improve service provision consistent with the role of the settlement concerned, where proposals are of scale and character appropriate to the area.
Parish Plans

The LDF Core Strategy, supported by the Allocations and Development Management DPD, provides a general framework for future development in the rural towns and villages. But it leaves room for more detailed proposals of local significance only to be developed locally through Parish Plans. These plans provide a mechanism for local communities, working with the Council, to develop their own proposals for the future development of their local area consistent with the LDF and the Sustainable Community Plan. The Council will encourage and support the development of Parish Plans within this context.

Policy LO 7

Development in Rural Settlements

Between all the settlements, provision will be made for a total of approximately 1,160 dwellings (2006-2026) on a range of sites suitable for residential use

Within the settlement confines of New Ash Green, Otford and Westerham development on a modest scale will be permitted where it can take place in an acceptable manner consistent with local character. In New Ash Green the village centre will be regenerated so that it better meets the needs of the local community whilst respecting the distinctive character of the settlement.

Within the settlement confines of Brasted, Crockenhill, Eynsford, Farningham, Halstead, Hartley, Hextable, Horton Kirby, Kemsing, Knockholt Pound, Leigh, Seal, Sevenoaks Weald, Shoreham, South Darenth, Sundridge and West Kingsdown infilling and redevelopment on a small scale only will be permitted taking account of the limited scope for development to take place in an acceptable manner and the limited range of services and facilities available.

Within all the settlements covered by this policy new development should be of a scale and nature appropriate to the village concerned and should respond to the distinctive local characteristics of the area in which it is situated.

The loss from rural settlements of services and facilities that serve the local community will be resisted where possible. Exceptions will be made where equivalent replacement facilities are provided equally accessible to the population served, or where it is demonstrated, through evidence submitted to the Council, that the continued operation of the service or facility is no longer financially viable. The Council will support and encourage innovative proposals to improve provision of services and facilities to serve the local community, subject to any development being of a scale and character appropriate to the area.

Existing suitable employment sites will be retained with the opportunity for regeneration and redevelopment to better meet the needs of business.

The Council will work with service providers to maintain and where possible improve rural transport services, so that the accessibility of rural communities is maintained.
Delivery Mechanisms:

The Allocations and Development Management DPD will allocate sites for residential development. Measures to maintain a supply of housing land are set out in the delivery of Policy LO1

The Allocations and Development Management DPD will define the boundaries of employment sites to be retained

The Council will work with partners, including landowners and the local community, to bring forward viable regeneration proposals for New Ash Green village centre in accordance with the policy.

The Council will lobby rural transport service providers to maintain and improve services.

Performance Indicators:

Actual distribution of housing development compared to the distribution in the Core Strategy
Changes in the Settlement Hierarchy services and facilities score for individual settlements
Number and proportion of vacant units in New Ash Green Centre.
The number of Parish Plans adopted by the Council.

Target

At least two thirds of new housing to be in Sevenoaks, Swanley and Edenbridge

Major Developed Sites

4.5.16 There are a number of sites in the District, divorced from existing settlements that have become built up over the years. All are in commercial use and their original development often pre-dates the introduction of planning control. All are within the Green Belt and the largest sites have been designated as “Major Developed Sites” in the Green Belt. These are listed below with the area of the designation:

1. Chaucer Business Park, Kemsing  4.4ha
2. Glaxo Smith Kline, Leigh  4.0ha
3. North Downs Business Park, Dunton Green  6.1ha
4. Fort Halstead, Halstead  41.0ha

4.5.17 The list was reviewed at the time of the last Local Plan, adopted in 2000, and there are no proposals to change the list of designated sites.

4.5.18 Proposals for development within Major Developed Sites will be considered in the light of Government guidance on the issue in Planning Policy Guidance Note 2 (Green Belts). This allows for development to take place within the designated area of the Major Developed Site provided criteria to prevent adverse impact on the Green Belt are met.
4.5.19 The Major Developed Sites form a significant part of the District’s employment land supply and their retention and redevelopment as employment sites will, along with other commercial sites, be subject to the provisions of Policy SP8. As these sites are in locations divorced from existing settlements future development proposals will need to include sustainable transport proposals for accessing the site, including travel plans where appropriate, consistent with Policy SP2.

4.5.20 Fort Halstead is a Major Developed Site within the Kent Downs AONB that was originally a Ministry of Defence research establishment and is still occupied by defence related industries. The defined boundary of the site in the Saved Local Plan does not fully reflect the developed area in business use and will be reviewed in the Allocations and Development Management DPD.

4.5.21 The main requirements of the current occupiers of Fort Halstead, QinetiQ and the Defence Science and Technology Laboratory (DSTL), may vary during the Plan period. The implications of a future decline in occupancy of the site will be considered within the policy framework of the Core Strategy and the Major Development Site guidance for Green Belts (PPG2) and the major developments guidance for Areas of Outstanding Natural Beauty (PPS7).

4.5.22 In February 2010 Glaxo Smith Kline announced its intention to close the site at Leigh, where it is the sole occupier. The Council will work with the current and prospective future occupiers to achieve a suitable future use of the site within the policy framework provided by the Core Strategy and PPG2 guidance on Major Developed Sites. This may involve the preparation of a Planning Brief as a supplementary planning document to guide future redevelopment.

4.5.23 Brands Hatch has become a centre, in the Green Belt, for sport and leisure activities based on the motor racing circuit. Saved Local Plan Policy WK2 provides a framework for balancing further development of outdoor sport, leisure and recreation at the circuit with limiting environmental impacts on the surrounding area, including nearby residents in West Kingsdown and protecting the Green Belt. It will be reviewed through the Allocations and Development Management DPD but still applies until then.

The Countryside

4.5.24 Outside settlements priority will be given to protection of the countryside. The countryside will be conserved and the distinctive features that contribute to the special character of the landscape and its biodiversity will be protected and enhanced where possible.

4.5.25 A Countryside Assessment has been completed identifying the distinctive features of the District’s landscape. It defines and describes the different types and character areas of the landscape and then evaluates each area in terms of the condition of the landscape and its sensitivity. The Countryside Assessment was adopted by the Council as Supplementary Planning Guidance when it was produced in 2004. It will be updated to have the added status of a Supplementary Planning Document and will be applied in considering the landscape impact of development and in looking for enhancement opportunities.

4.5.26 The biodiversity of the countryside will be protected through the safeguarding of nationally and locally designated sites and support for the Kent Biodiversity Plan. Opportunities for enhancement will be sought through support for countryside enhancement schemes and in connection with development proposals.

4.5.27 The District has a well-developed network of footpaths and bridleways that enable access to the countryside. Recreational paths include the North Downs Way, the Greensand Way, the Wealdway, the Darent Valley Path and the Eden Valley Walk. There is a Country Park at Lullingstone and extensive areas of countryside with public access. The Council will continue to seek access improvements, including links between town and country, through the Green Infrastructure Network (see Policy SP10) and will also seek improvements in interpretation facilities to promote enjoyment and understanding of the countryside.
4.5.28 Horse riding is a significant recreational activity in rural areas of the District which offers benefits to rural communities but horse-related activities (often referred to as “horsiculture”), including stables and paddocks, can have landscape impacts that require careful consideration. A Supplementary Planning Document will be produced giving more detailed guidance on the issue.

4.5.29 The Council is a supporter of the North West Kent Countryside Partnership, which also includes Kent County Council, the Environment Agency and adjoining Districts. It will continue to support enhancement projects through the Countryside Partnership.

4.5.30 Over 60% of the District lies within either the Kent Downs or High Weald AONB. Both AONBs have produced Management Plans that have recently been updated. These set out a range of measures to protect and enhance the distinctive features of each AONB and the Council will support their implementation.

4.5.31 The countryside is also a place of work and recreation. The rural economy has traditionally been dependent on agriculture but has increasingly diversified as the agricultural industry has changed in response to modern requirements. The Council will support small scale development proposals that contribute to diversification of the rural economy where these are compatible with policies to protect the countryside. This includes proposals for tourism and recreational developments that contribute to the rural economy. The District benefits from a high percentage of woodland cover which is a vital component of its landscape character, biodiversity, amenity and green infrastructure. The Council will take a positive role in the conservation and enhancement of woodlands in the District and encourage their management for biodiversity, amenity and economic use, including their potential contribution to sustainable energy production.

4.5.32 Particular encouragement will be given to business developments that re-use existing buildings and there will generally be a preference for commercial over residential development in considering proposals for change of use of rural buildings.

4.5.33 The District, as part of the West Kent Partnership, has been successful in obtaining “Leader” funding to support rural businesses and communities. The Leader programme aims to promote sustainable business growth within the land based and rural economies in the area. Key objectives are:

- Improve competitiveness and financial sustainability of West Kent’s farming and forestry
- Encourage innovation and diversification in West Kent’s land based sector
- Promote entrepreneurship in rural West Kent
- Encourage the development of rural tourism-related businesses
- Address pockets of deprivation and encourage vibrant rural communities
- Ensure best practice in land management and promote sustainable development

Policy LO8

The Countryside and the Rural Economy.

The extent of the Green Belt will be maintained.

The countryside will be conserved and the distinctive features that contribute to the special character of its landscape and its biodiversity will be protected and enhanced where possible. The distinctive character of the Kent Downs and High Weald Areas of Outstanding Natural Beauty and their settings, will be conserved and enhanced.
Particular regard will be given to the condition and sensitivity of the landscape character and securing the recommended landscape actions in the proposed SPD to ensure that all development conserves and enhances local landscape character and that appropriate mitigation is provided where damage to local character cannot be avoided.

Development that supports the maintenance and diversification of the rural economy, including development for agriculture, forestry, small scale business development and rural tourism projects, and the vitality of local communities will be supported provided it is compatible with policies for protecting the Green Belt, the Kent Downs and High Weald Areas of Outstanding Natural Beauty conserves and enhances the value and character of the District’s woodland and the landscape character of other rural parts of the District and that it takes account of infrastructure requirements.

**Delivery Mechanisms:**

The provisions of the Countryside Assessment will be applied in evaluating developments affecting the countryside and in developing countryside projects. It will be updated to have the status of a Supplementary Planning Document

Working with partners the Management Plan proposals for the Kent Downs and High Weald AONBs will be implemented

Projects to conserve and enhance the landscape, the biodiversity of the countryside, access to the countryside and countryside interpretation will be promoted through the North West Kent Countryside Project working with local communities

A Supplementary Planning Document will be produced covering horse related development

Leader funding will be used to support the diversification of the rural economy

The Kent Downs AONB Landscape Design Handbook will be used where relevant in advising developers and considering enhancement projects.

**Performance Indicators:**

Development permitted contrary to Green Belt policy

Progress in implementing countryside projects in the District, including AONB

Management Plan projects affecting the District.
5.1 The Design of Development and Conservation

5.1.1 A distinguishing feature of the District is the high quality of the natural and built environment. Sevenoaks contains two AONBs and other areas of attractive landscape identified in the Countryside Assessment. The built and historic heritage of Listed Buildings, Conservation Areas, Historic Parks and Gardens, Scheduled Ancient Monuments and sites of archaeological interest, contribute to the special quality and character of many parts of the District. A key responsibility of the plan is to ensure their continued protection, conservation and enhancement. The District’s towns and villages also include other areas of high quality environment.

5.1.2 National policies provide for the protection of key historic assets and these will be applied rigorously across the District to ensure that its historic heritage is maintained. At a local level Conservation Area Appraisals and Management Plans will be used to provide guidance on distinguishing features of the historic environment that should be protected, together with identifying opportunities for enhancement. A general guidance document on Conservation Areas will be produced to complement the specific guidance for individual areas. The Council aims to produce a List of Buildings of Local Architectural or Historic Interest during the Core Strategy period, to be adopted as a Supplementary Planning Document.

5.1.3 New development must be accommodated without damaging the features that contribute to the quality of the urban and rural environment. Therefore, it is important that development is designed to respect or improve the character and distinctiveness of the area in which it is located. Guidance will be provided at a local level through Character Area Assessments covering the main urban areas and Village Design Statements and Parish Plans for rural areas.

5.1.4 Good design has a central role in the Sustainable Community Plan. The “Green Environment” theme aims to ensure the District is a place where people can enjoy high quality rural and urban environments and the quality of new development is seen as a key factor in maintaining and enhancing the overall environmental quality of the District. The “Building for Life” criteria, produced by the Commission for Architecture and the Built Environment (CABE) provide a wide-ranging and objective basis for assessing the quality of new housing. The criteria are listed in Appendix 5 and the performance of new development against the criteria will be used as the key indicator for measuring success in achieving high quality design.

5.1.5 The strategic policy sets a general framework within which more detailed and locally-specific guidance can operate, listed below under “Delivery Mechanisms”. In addition Saved Local Plan Policy EN1 will continue to provide a detailed basis for control of development until it is replaced in the Allocations and Development Management DPD.

Policy SP 1
Design of New Development and Conservation

All new development should be designed to a high quality and should respond to the distinctive local character of the area in which it is situated. Account should be taken of guidance adopted by the Council in the form of Kent Design, local Character Area Assessments, Conservation Area Appraisals and Management Plans, Village Design Statements and Parish Plans. In rural areas account should be taken of guidance in the Countryside Assessment and AONB Management Plans.

In areas where the local environment lacks positive features new development should contribute to an improvement in the quality of the environment.
New development should create safe, inclusive and attractive environments that meet the needs of users, incorporate principles of sustainable development and maintain and enhance biodiversity.

The District’s heritage assets and their settings, including listed buildings, conservation areas, archaeological remains, ancient monuments, historic parks and gardens, historic buildings, landscapes and outstanding views will be protected and enhanced.

Delivery Mechanisms:

The Council will work with local communities to produce Village Design Statements, Parish Plans and Character Area Assessments to be adopted as Supplementary Planning Documents to provide detailed locally-specific guidance to support the general policy.

Conservation Area Appraisals have been produced for all of the District’s Conservation Areas, some of which have been replaced with Appraisals and Management Plans. These will be kept up to date through regular review, replacing the remaining Appraisals with Appraisals and Management Plans, and adopted as Supplementary Planning Documents. General guidance will also be produced as a Supplementary Planning Document, giving advice on development in Conservation Areas.

Development Briefs will be produced to give detailed design guidance on individual sites.

The Council will work with Kent County Council and other partners to maintain and update Kent Design as a Supplementary Planning Document.

The adopted Residential Extensions SPD provides detailed guidance on householder development.

Secured by Design principles will be applied in assessing development.

Performance Indicators:

Performance of new housing against Building for Life criteria

The proportion of Conservation Areas with up to date Appraisals

Target:

No loss of listed buildings, historic parks and gardens, scheduled ancient monuments or sites of archaeological interest

No reduction in the extent of Conservation Areas due to insensitive development

Two thirds of new housing development to be rated good or better against Building for Life criteria and no development to be rated poor.
5.2 Sustainable Development, Climate Change and Air Quality

5.2.1 Government guidance in the Supplement to Planning Policy Statement No.1 states, it is generally accepted climate change is occurring and that it is a serious and urgent issue on which we need to act to reduce the emissions of greenhouse gases that contribute to climate change. It adds that planning has a role to play in reducing emissions and that planning also has a role in adapting to anticipated climate change.

5.2.2 In October 2007, the Council signed the Nottingham Declaration on Climate Change and has since adopted a Carbon Reduction Management Action Plan. The Council is also preparing a corporate Climate Change Strategy. Together with the Core Strategy which promotes sustainable and resource efficient development and seeks to reduce dependency on the private motor car, these corporate initiatives will ensure that those living, working at or visiting the District will reduce their carbon emissions.

5.2.3 The main issues for Sevenoaks in terms of Climate Change mitigation are:

- High average CO2 emissions: Carbon Dioxide emissions can originate from many sources with the majority arising from the burning of fossil fuels to provide energy and the use of petroleum in transport. There is a considerably higher level of domestic CO2 emissions per person in Sevenoaks District than at county, regional or national levels.
- High Energy consumption. The total energy consumption in Sevenoaks District is above the average for local authorities in Britain. The per capita energy consumption in Sevenoaks District is 18% more than the South East average, 8% more than the Kent average and 10% more than the national average. The Code for Sustainable Homes and the BREEAM standards require mandatory energy reduction measures in new developments.

5.2.4 In the context of future development in the District the main areas where there is potential to reduce emissions of greenhouse gases are:

- By locating new development where it is accessible to services and facilities thereby reducing the need to travel and requiring new dwellings, employment uses, shops and services to provide for safe and convenient public transport, walking and cycling, so that reliance on the car can be reduced. This is a key principle behind the strategy for locating development set out earlier in the document.
- By investing in public transport services and walking and cycling facilities to increase the accessibility and attractiveness of these more sustainable transport modes.
- By incorporating sustainable construction principles, including renewable energy, to reduce emissions from new development.

5.2.5 The main issues for Sevenoaks in terms of adapting to future climate change are:

- Flood risk, which is forecast to increase due to more extreme weather conditions. The Council’s Strategic Flood Risk Assessment estimates the extent to which the 1:100 year flood plain will increase due to climate change and this will be taken into account in ensuring new development is not located in areas liable to flood. In addition there is scope for introducing sustainable drainage systems (SUDS) that reduce surface water run-off from development and thereby offer the potential to reduce the severity of future flooding.
- Water shortages, which may result from more frequent summer droughts. Each of the four water companies operating in the district are classified as water stressed and have high levels of average household water consumption. Parts of Sevenoaks District are being over-abstracted and therefore the amount of groundwater in these areas is reducing. This reduction in groundwater can increase the likelihood and severity of drought. Climate change is predicted to reduce rainfall within the South East which will inevitably place further pressure on an already pressurised region. The Code for Sustainable Homes and the BREEAM standards require mandatory water...
use reduction measures in new developments which can make a contribution, along with other measures to reduce water consumption, in mitigating the impact. Sevenoaks District Council will assist the UK in achieving the objectives of the Water Framework Directive by delivering appropriate actions set out in River Basin Management Plans. Winter water storage reservoirs and other sustainable land management practices which reduce summer abstraction, diffuse pollution and run off, increase flood storage capacity and benefit wildlife and recreation will be encouraged.

**Sustainable Construction and Energy Generation**

5.2.6 There is a strong local case for seeking an improvement in the overall sustainability, including the energy performance and water consumption of new development.

5.2.7 The Code for Sustainable Homes is a nationally recognised tool for assessing the incorporation of sustainability features in new housing. The Code is made up of nine categories and includes mandatory features at all levels which ensures a high level of sustainability including energy efficiency, water efficiency, sustainable drainage and waste reduction. From 2010 new development will be required through the Building Regulations to reach the energy standards set out in Code Level 3 and after that improvements are planned so that by 2016 all new housing will be carbon neutral (i.e. there will be no net emissions). For commercial and institutional development the BREEAM Standard is used as an assessment tool, it assesses buildings against ten categories and also has mandatory elements regarding carbon emissions and water consumption. BREEAM can also be used to assess conversions to commercial, industrial and residential use.

5.2.8 The Council will initially apply Code for Sustainable Homes Level 3 (progressing to Code Level 4 from 2013 and Level 6 by 2016), and BREEAM “Very Good” standard (increasing to “Excellent” standards from 2013). High quality residential and commercial schemes that exceed the standards will be encouraged.

(M) indicates mandatory elements

5.2.9 In relation to improving the energy efficiency of existing development, the adopted Residential Extensions Supplementary Planning Document outlines energy efficiency measures which can be incorporated. Sevenoaks District Council also actively supports the CERT (Carbon Emission Reduction Target) programme to local residents through a mix of direct marketing and indirect marketing of both the Kent-wide discount scheme and active promotion of the local Energy Saving Trust advice centre. Further initiatives are being examined to promote retrofitting of existing homes. In addition, the Council will promote the incorporation of combined heat and power and decentralised energy in larger scale new development where feasible.
5.2.10 The South East Plan Policy NRM11 requires local targets to be set for the provision of
renewable and decentralised energy. Code level 3 can theoretically be achieved without the use of
renewable or low carbon energy resources although there is a very small margin of error. Nevertheless,
in order to reduce carbon emissions in a district which does not currently perform well in this respect,
in addition to meeting Code level 3, initially a minimum 10% reduction of carbon emissions from
residential, commercial and institutional development must be achieved through the use of
decentralised, renewable or low carbon technologies subject to technological and financial feasibility.
Code level 4 and above are not expected to be achieved through improvements to the building fabric
alone but progressive reductions in CO2 emissions will be achieved through the use of renewables
over the plan period as the overall Code level and BREEAM standard requirements increase.

5.2.11 There are associated costs with complying with the Code for Sustainable Homes levels and
BREEAM standards. Applicants will be required to submit evidence if they feel that compliance is not
technically or financially achievable having regard to the type of development involved and its design.

Transport

5.2.12 The emerging Transport Strategy is summarised in a box following paragraph 3.4.3, together
with its relationship to the Core Strategy.

5.2.13 The dispersed rural nature of Sevenoaks District results in bus operators finding it difficult
to run many commercially viable bus services and many existing services are subsidised by KCC.
Limited development in rural areas is unlikely to provide a catalyst for improved bus services serving
these areas. The Transport Strategy suggests that innovative public and community transport solutions,
such as dial-a-ride and car pooling, will need to be developed in these areas to improve accessibility.
The Council sets out its commitment to maintaining and improving accessibility in rural communities
in Core Strategy policy L07.

5.2.14 Network Rail’s draft Route Utilisation Strategies (RUSs) for Kent (April 2009) and Sussex
(May 2009), together with the published South London RUS (March 2008), consider the future
development of all rail services and lines serving Sevenoaks District and take into account housing
development policies in the South East Plan. The RUSs find limited scope for increasing the capacity
and frequency of peak train services between Sevenoaks District and London, although the introduction
of domestic services on High Speed One is expected to relieve some of the existing overcrowding
because of the reduction in passengers travelling through Sevenoaks District. Opportunities exist to
promote greater train travel for journeys other than commuting to London. Improving accessibility to
stations by all modes and improving the quality of facilities available at stations can help to achieve
this. Some improvements to Sevenoaks and Swanley Stations will be delivered through Network
Rail’s, Department for Transport backed, National Station Improvement Programme.

5.2.15 Walking and cycling are the most sustainable forms of transport. The Transport Strategy
promotes improvements to walking and cycling facilities and networks, especially within the urban
areas of Sevenoaks, Swanley and Edenbridge, to improve the safety and convenience of these
modes, and opportunities will also be sought in connection with new development. Where opportunities
do not exist to provide formal cycle routes along existing key roads, the local authorities will investigate
the potential for identifying off road cycle routes and encouraging cyclists to use safer and less busy
roads, through appropriate signage.

5.2.16 Travel Plans can reduce reliance on the private car by promoting the opportunities for
travelling to and from sites by public transport, walking or cycling and by offering new opportunities
to reduce car use, through the establishment of car sharing services or car clubs, for example. The
Council will work with existing employers and schools to encourage them to prepare Travel Plans
and will require new developments to prepare and adopt them using Kent County Council’s guidance
on Travel Plans (Transport Assessments and Travel Plans, October 2008) as the basis for determining
when such plans will be required. Policy LO4 includes specific provisions for Travel Plans in Swanley.
5.2.17 The Transport Strategy notes that the relatively limited level of development proposed in Sevenoaks District in the plan period is unlikely to have significant impacts on the local road network. However, the detailed transport impacts of development proposals will need to be assessed at the planning application stage and in some instances development may be conditional on implementation of specific transport mitigation measures. The Council will also work with Kent County Council to review maximum parking standards for the District.

5.2.18 The Council considers that there are benefits from the construction of east facing slip roads to the M25/M26 in relieving traffic congestion and potentially benefiting Air Quality Management Areas, although further work is needed to assess their impact. However, the Highways Agency has no plans at present to deliver the scheme and the Core Strategy does not rely on its provision. The Transport Strategy includes a proposal, which the Council supports, to work with the Highways Agency to find an appropriate solution to congestion on the A25 and access to/egress from the M25/26.

Air Quality

5.2.19 Poor air quality is an issue in certain parts of the District alongside main roads. Eleven Air Quality Management Areas have been declared and the Council has an Air Quality Action Plan (2009) that includes measures to improve air quality.

5.2.20 Road traffic is the main contributor to poor air quality and the level of traffic, particularly through traffic is largely outside the control of the District. Policies in the LDF will have some impact on traffic levels though they can only be part of the solution. Locating new development where it is accessible to services and facilities will have a beneficial impact in reducing the need to travel, while applying policies to retain services and facilities that meet a local need together with promoting alternatives to car travel should also reduce the need to travel by car to reach essential services.

5.2.21 Future development should avoid adverse impact on air quality, particularly in Air Quality Management Areas where there is a need to improve air quality. In areas of poor air quality careful design of new development will be needed to ensure an acceptable environment for future occupiers.

Noise

5.2.22 The Allocations and Development Management DPD will include a policy on developments and locations sensitive to noise and developments generating significant noise levels. This will include consideration of noise issues in Areas of Outstanding Natural Beauty.

Policy SP 2

Sustainable Development

Sustainable Construction and Low-Carbon Energy Generation

The District will contribute to reducing the causes and effects of climate change by promoting best practice in sustainable design and construction to improve the energy and water efficiency of all new development and contribute to the goal of achieving zero carbon development as soon as possible.

1. New homes will be required to achieve at least Level 3 of the Code for Sustainable Homes, progressing to Level 4 from 2013 and will be encouraged to achieve Level 6 by 2016.
2. All new commercial (A1-A5, B1-2, B8, C1, D1) and institutional (C2, D1) development, (including conversions) and conversions to residential use will be required to achieve BREEAM “Very Good” standards increasing to “Excellent” standards from 2013 and must incorporate sustainable drainage systems (SUDS) where practical together with arrangements to secure their long term maintenance.

3. Achievement of the Code levels and BREEAM standards must include at least a 10% reduction in the total carbon emissions through the on-site installation and implementation of decentralised, renewable or low-carbon energy sources.

4. Applicants must submit evidence which demonstrates how the requirements have been met or which demonstrate that compliance is not technically or financially feasible.

5. The District will support and promote the incorporation of decentralised energy sources including combined heat and power in new development and will support small scale and community-based renewable energy developments where such development does not adversely affect the openness of the Green Belt and is consistent with AONB policy.

Transport

The Council will support and promote measures to reduce reliance on travel by car both in providing for new development and in supporting measures promoted through the Transport Strategy. Specifically it will:

1. Support improvements to enhance the safety and convenience of public and community transport.
2. Seek improved facilities for cyclists and pedestrians
3. Require the inclusion of Travel Plans and other appropriate measures in new developments that generate significant traffic volumes

Air Quality

The design and location of new development will take account of the need to improve air quality in accordance with the District’s Air Quality Action Plan. Development in areas of poor air quality or development that may have an adverse impact on air quality will be required to incorporate mitigation measures to reduce impact to an acceptable level. New development in areas of poor air quality will be required to incorporate measures in the design and orientation that demonstrate an acceptable environment will be created for future occupiers. Permission will be refused where unacceptable impacts cannot be overcome by mitigation.

Delivery Mechanisms:

The provisions of Kent Design will be applied in relation to sustainable design and construction, including sustainable drainage. Further guidance will be developed on what is required to be submitted at the planning application stage in order to assess compliance with the policy.

The Residential Extensions SPD contains specific guidance on the incorporation of energy efficiency measures in residential extensions
The Allocations and Development Management DPD will identify opportunities for combined heat and power, which will be taken forward where necessary in development briefs. The Allocations and Development Management DPD will include provision for cyclists and pedestrians in new development where opportunities for improvement can be identified.

The Local Transport Plan and the Sevenoaks District Strategy for Transport will identify the transport initiatives to be implemented to achieve the LTP and Core Strategy visions.

Policy SP9 sets out the Council’s approach to the provision of new transport infrastructure. Where required, land will be allocated or safeguarded through the Allocations and Development Management DPD.

The Allocations and Development Management DPD and Planning Briefs, where relevant, will identify measures to mitigate air quality impacts of new development, particularly in Air Quality Management Areas.

Performance Indicators:

Proportion of new development that meets or exceeds the required Code for Sustainable Homes level or BREEAM standards where relevant.

Number of large scale renewable, decentralised and combined heat and power schemes installed by capacity and type.

The number and percentage of new residential units permitted annually within 30 minutes public transport time of a GP, hospital, primary and secondary school and a town centre or local service centre.

The number of new developments where a travel plan has been adopted in the annual monitoring period.

Progress in implementing schemes identified through the Local Transport Plan and the Sevenoaks District Strategy for Transport (see Performance Indicator for Policy SP9).

Changes in air quality in Air Quality Management Areas

Percentage of travel plan progress reports where the travel plan is achieving its modal split target(s) or has taken additional measures to achieve the target.

Length of additional Public Rights of Way and cycle routes developed in the District annually, including the length secured through implementing proposals in the Cycling Strategy.

Target:

All new development to comply with the relevant Code of Sustainable Homes or BREEAM
5.3 Housing Policies

Provision of Affordable Housing

5.3.1 The planning system has an important part to play in providing affordable housing for those unable to access the housing market. The need to provide affordable housing is important for two main reasons; firstly to enable people who cannot afford to rent or buy on the open market to live in a home that is suitable for their needs and that they can afford, and secondly to provide housing for people working in different aspects of the local economy, thus underpinning economic activity.

5.3.2 PPS3 sets out the Government’s policy for securing the provision of affordable housing, which it defines as including:

“social rented and intermediate housing provided to specified eligible households whose needs are not met by the market.”

5.3.3 This plan uses the same definition. Intermediate housing includes shared ownership but the definition excludes low cost market housing. Affordable housing is expected to be provided within new housing schemes and PPS3 sets a national indicative threshold of 15 units for requiring provision to be made, although this can be varied based on local circumstances.

5.3.4 The South East Plan identifies a series of sub-regional housing markets and Sevenoaks District, together with Tonbridge and Malling and Tunbridge Wells, lies within the West Kent housing market area. A West Kent Strategic Housing Market Assessment has been completed in accordance with Government guidance and is being taken into account in the current review of the Council’s Housing Strategy. It shows a high level of need for affordable housing across the housing market area and a shortfall in comparison with existing provision. In view of the level of need the study recommends a target of at least 40% affordable housing for all suitable sites. It also recommends that authorities consider a range of site thresholds below 15 units recognising that viability issues may require lower target levels or commuted sums for delivery on alternative sites.

5.3.5 The provision of affordable housing is not just important in responding to housing need, it is also important to the economy. The West Kent Area Investment Framework identifies lack of affordable housing as a factor contributing to labour supply shortages. It is therefore important to increase future supply.

5.3.6 In the last five years, 59% of new dwelling completions in the District were on sites below the Government’s indicative 15 dwellings threshold, with the proportion of larger sites particularly low in rural areas. This means that most developments have not been required to contribute to affordable housing and as a consequence the number of affordable units achieved has fallen short of regional guidelines. This trend of a relatively high proportion of completions on small sites is likely to continue.

5.3.7 A lower site size threshold is, therefore, required if the proportion of affordable housing in new housing developments is to be increased in response to the level of need.

5.3.8 To examine the impact of a lower site size threshold on the viability of housing development an Affordable Housing Viability Assessment has been carried out. The assessment found that:

- For developments of 15 units or more a 40% on-site affordable housing requirement would maintain viability.
- For developments of 5-14 units there is room for an on-site affordable housing requirement, whilst maintaining viability. Maintaining the 40% requirement could have an adverse impact on viability and instead the assessment recommends a sliding scale approach with a requirement of 30% for developments of 10-14 units and 20% for 5-9 units.
For developments of less than five units an on-site contribution could not be justified on viability grounds. However, there is scope for a financial contribution towards off-site provision whilst maintaining viability of development. The assessment recommends a contribution based on the equivalent of providing 10% affordable housing but this would only apply to developments involving a net increase in the number of dwellings.

5.3.9 These findings are accepted and form the basis of the requirements in Policy SP3. In view of the level of need the Council does not see a case for setting the requirement below the maximum level that would maintain viability.

5.3.10 Provision for affordable housing on developments of five units or more should be made on site. In exceptional circumstances where it is demonstrated to the Council’s satisfaction through an independent assessment of viability that provision in accordance with the policy would not be viable, a reduced level of provision may be accepted or, failing that, a financial contribution towards provision off-site will be required.

5.3.11 Within the affordable housing total, provision can include social rented and intermediate housing (which includes shared ownership). Taking account of the level of need the Council will expect at least 65% to be social rented. However on a site-by-site basis the specific balance of rent and intermediate housing should address any identified local need and the size and type of affordable housing provided should also reflect local need.

5.3.12 Financial contributions will be used to increase provision of affordable housing on other sites in the District, including enabling local housing schemes in rural parishes. In addition the Strategic Housing Market Assessment recommends that authorities develop strategies to make better use of the existing housing stock by providing incentives to reduce the substantial under-occupation of family houses in the social rented sector and funding may also be used to support such initiatives. This approach accords with South East Plan policy H6 on making better use of the existing housing stock. A supplementary planning document will be prepared to give guidance on the implementation of policy in this area including arrangements for financial contributions.

5.3.13 The Council will expect the provision of affordable housing to be secured through the involvement of a Registered Social Landlord who is one of the Council’s preferred partners. Where this is not the case the Council will expect the RSL to meet the standards required of Council’s preferred partners.

5.3.14 Permission will be refused for development that makes no contribution or inadequate contribution to affordable housing where provision could reasonably be made under the terms of the policy.

**Policy SP 3

Provision of Affordable Housing

In order to meet the needs of people who are not able to compete in the general housing market, the Council will expect the provision of affordable housing in all types of residential development including specialised housing. The location, layout and design of the affordable housing within the scheme should create an inclusive development.

The level and type of affordable housing required in any residential development will be assessed against the following criteria:-

---

11 For the purposes of this policy “residential development including specialised housing” refers to development within Use Class C3 but not development within Use Class C2.
1. In residential developments of 15 dwellings or more gross 40% of the total number of units should be affordable.

2. In residential developments of 10-14 dwellings gross 30% of the total number of units should be affordable.

3. In residential developments of 5-9 units gross 20% of the total number of units should be affordable.

4. In residential developments of less than 5 units that involve a net gain in the number of units a financial contribution based on the equivalent of 10% affordable housing will be required towards improving affordable housing provision off-site.

Where an element of affordable housing is required at least 65% of the affordable housing units should be social rented, unless the Council is satisfied that an alternative mix meets a proven need.

In exceptional circumstances where it is demonstrated to the Council’s satisfaction through an independent assessment of viability that on-site provision in accordance with the policy would not be viable, a reduced level of provision may be accepted or, failing that, a financial contribution towards provision off-site will be required.

Permission will be refused where the size of the development is artificially reduced to fall below the threshold requiring provision of affordable housing.

**Delivery Mechanism:**

The Allocations and Development Management DPD will provide guidance on requirements for affordable housing on identified sites taking account of the policy.

A Supplementary Planning Document will be prepared to give guidance on the implementation of the policy, including arrangements for financial contributions.

Development Briefs on larger sites will provide guidance on requirements for affordable housing taking account of the policy.

The policy will be applied in considering planning applications for residential development and provision of affordable housing will be secured through the Council’s standard legal agreement and nominations agreement.

**Performance Indicators:**

Affordable housing completions per annum

Proportion of affordable housing provided in the social rented and intermediate sectors.
Target:
From adoption of the Core Strategy an average of 66 affordable housing completions per annum
(Note: This target to be reviewed in conjunction with the Housing Strategy review.)

Affordable Housing in Rural Areas

5.3.15 Even with a lower threshold the opportunities to provide additional affordable housing in rural areas of the District are more limited because there is less scope generally for new housing development. Government guidance in PPS3 allows for small scale affordable housing to be provided through the use of a “rural exceptions site policy” under which small sites that would not normally be suitable for development because of restraint policies can be developed solely for affordable housing to serve small rural communities. PPS3 adds that rural exception sites should only be used for affordable housing in perpetuity.

5.3.16 Policy H3 of the South East Plan identifies a role in increasing affordable housing provision for small scale affordable housing schemes within or well-related to rural settlements, possibly including land which would not otherwise be released for development.

5.3.17 The Council’s approach to the consideration of rural exception sites is based on firstly assessing need, then searching for suitable sites and then supporting the development of an agreed scheme.

5.3.18 The Council has a programme of rural housing needs surveys carried out through “Action with Communities in Rural Kent”. Where the survey shows evidence of need the Council will work with the local community and housing providers to identify and assist in delivering suitable sites that meet the criteria in Policy SP4. The development of Green Belt land for rural exception sites will only be acceptable where there is evidence of a local need in the parish for affordable housing, identified through the needs survey described above, that could not be met by developing non Green Belt land. Sites released as an exception to policy should be made available exclusively for affordable housing to meet strictly defined local needs in perpetuity.

5.3.19 For the purposes of the policy local need is defined as follows:

The need of those unable to gain access to existing local accommodation suited to their needs at an affordable cost (the onus being on the household to prove they cannot afford to buy locally at current house prices within the limits of the disposable income available to them) and that fall within one or more of the following categories:

- those in the Parish currently in accommodation unsuited to their circumstances for physical, medical, or social reasons and which is incapable of being improved. “Improvement” in this context means any improvement achievable with grant assistance;
- those who are dependants of households who have been resident in the Parish either for a continuous period of three years or alternatively any five years out of the last ten;
- those who have been members of households currently living in the Parish and who have recognised local connections, i.e. having family resident in the area for a minimum of ten years;
- those employed full-time in the Parish on other than a short-term basis, or those who will be taking up such employment there, or those who provide an important service requiring them to live locally.
Policy SP 4
Affordable Housing in Rural Areas

Small scale developments for affordable housing only will be developed to meet local needs identified through rural housing needs surveys. The following criteria will be applied in identifying sites:

a. the local need identified through the rural housing needs survey cannot be met by any other means through the development of sites within the defined confines of a settlement within the parish or, where appropriate, in an adjacent parish;

b. the proposal is of a size and type suitable to meet the identified local need and will be available at an appropriate affordable cost commensurate with the results of the appraisal. The proposal is accompanied by a financial appraisal proving the scheme will meet the defined need. Schemes which propose an element of cross subsidy will not be acceptable;

c. the proposed site is considered suitable for such purposes by virtue of its scale and is sited within or adjoining an existing village, is close to available services and public transport, and there are no overriding countryside, conservation, environmental, or highway impacts. The initial and subsequent occupancy of sites developed under this policy will be controlled through planning conditions and agreements as appropriate to ensure that the accommodation remains available in perpetuity to meet the purposes for which it was permitted.

Delivery Mechanism:

The Council will maintain a programme of rural housing needs surveys.

The Council will work with local communities and housing providers to identify and bring forward potential sites where a need is established.

The Council will develop a standard legal agreement that ensures the occupancy of developments is controlled in accordance with the policy.

Performance Indicator:

Affordable housing completions in rural areas under the policy.

Housing Size and Type

Housing Size

5.3.20 The Strategic Housing Market Assessment shows that the District has a high proportion of large dwellings in its housing stock. Population forecasts show a trend towards smaller average household size, including an increasing proportion of single person households and the assessment recommends future provision should favour of one and two bedroom units to address the current imbalance and respond to future demographic change. While the size profile of new dwellings will
only lead to gradual change in the make up of the overall housing stock, increasing the proportion of smaller units in new development will over time lead to a better balance between the housing stock and the size of dwellings needed in the future.

5.3.21 The low proportion of smaller units in the housing stock contributes to the relatively high average price of housing in the District. More small units should lead to an increase in the proportion of relatively low cost market housing available to buy, assisting those who are just able to afford to buy on the open market.

5.3.22 The Strategic Housing Market Assessment recommends targets for market housing of 20% one bedroom, 30% two bedroom, 35% three bedroom and 15% four or more bedroom and for affordable housing it recommends 35% one bedroom, 30% two bedroom and 35% three and four bedroom. Taking account of these recommendations the Council will seek to achieve an average of 50% two bedroom or less across all developments. This is not intended to be a quota and in considering individual development schemes account will also be taken of the range of dwelling sizes of market and social housing in the local area and of site specific factors in considering the mix of dwelling sizes.

Housing Type

5.3.23 The proportion of older people in the population is forecast to rise, with the proportion of people over 65 rising from 18% to 26% (2006-2026) and the proportion over 85 nearly doubling from 2.6 to 5.1% (source: Kent County Council population forecasts). While health improvements mean that older people are remaining active for longer, an increase in the number of frail elderly is to be expected.

5.3.24 The housing stock needs to adapt to meet the requirements of an ageing population. This means providing new homes that enable people to continue to live independently even though their mobility may be reduced. The ability to adapt homes is one of the “Building for Life” criteria that will be used in assessing new housing schemes (see policy SP1 and Appendix 5). While most older people prefer to remain in their own homes the ageing population will also mean some increased provision will be needed of housing specifically designed for older people including those with special needs. Housing to meet the needs of older people contributes to the Community Strategy theme of safe and caring communities.

5.3.25 People with disabilities form a significant proportion of the population and also need homes that can be adapted to meet their needs.

The Efficient Use of the Existing Housing Stock

5.3.26 The Council is pursuing a range of housing initiatives to make better use of the existing housing stock, complementing Core Strategy policies. These are contained in the Private Sector Housing Assistance Policy (2008), West Kent Housing’s “Small is Beautiful” Scheme and the Empty Homes Action Plan (2009). The scope for further initiatives will be considered in the emerging Housing Strategy Action Plan and kept under subsequent review.

Policy SP 5

Housing Size and Type

The Council will expect new housing development to contribute to a mix of different housing types in residential areas taking into account the existing pattern of housing in the area, evidence of local need and site specific factors. It will seek the inclusion of small units (less than three bedrooms) in new development schemes in suitable locations to increase the proportion of smaller units in the District housing stock.
The Council will seek the provision of an increased proportion of housing designed to the lifetime homes standard that can be readily adapted to meet the needs of older people and people with disabilities.

Sheltered housing and extra care housing for people with special needs will be encouraged on suitable sites in areas close to a range of services that provide for the needs of future occupants.

**Delivery Mechanisms:**

The Allocations and Development Management DPD will provide guidance on the mix of development on identified sites taking account of the policy, including identifying housing sites that may be particularly suitable for extra care provision.

Development Briefs on larger sites will provide guidance on the mix of development taking account of the policy.

The policy will be applied in considering planning applications for residential development.

**Performance Indicator:**

Housing completions by size

Number of sheltered housing and extra care housing units completed

Percentage of dwellings completed meeting the lifetime homes standard

**Provision for Gypsies and Travellers and Travelling Showpeople**

**5.3.27** At the time the Government indicated its intention to abolish regional strategies a Partial Review was under way to identify the scale of future requirements for gypsy and traveller accommodation and travelling show people and how provision for each should be distributed across the region down to District level. Government Circular 01/06 contains a definition of gypsies and travellers (reproduced in the Glossary) which will be used in applying policy. The preferred option for the partial review, which had been submitted by the Region for independent examination, required an additional provision for the District of 19 permanent pitches for gypsies and travellers up to 2016. There are currently no sites for travelling showpeople in the District and the preferred option proposed that one site should be provided. The Partial Review was abandoned before the Panel Report on the examination was complete.

**5.3.28** A Gypsies and Travellers Accommodation Assessment has been completed for Sevenoaks.

**5.3.29** The Allocations and Development Management DPD will set an overall level of future provision for gypsy and traveller accommodation and for travelling showpeople and will identify sites to meet the level of provision that is set taking account of relevant planning policy guidance. New gypsy and traveller sites in the Green Belt are normally inappropriate development. Depending on the level of provision to be made, the Council may need to consider minor amendments to Green Belt boundaries.
Policy SP 6

Provision for Gypsies and Travellers and Travelling Showpeople

Sites will be provided by means of allocations in the Allocations and Development Management DPD for gypsies and travellers and, if required, for travelling showpeople. The identification of sites in the Allocations and Development Management DPD will take account of the following criteria:

a. The site should be located within or close to existing settlements with a range of services and facilities and access to public transport

b. The site is of a scale appropriate to accommodate the facilities required and will offer an acceptable living environment for future occupants in terms of noise and air quality

c. Safe and convenient vehicular and pedestrian access can be provided to the site

d. The site is not located within an area liable to flood

e. The development will have no significant adverse landscape or biodiversity impact. In the AONBs, sites should only be allocated where it can be demonstrated that the objectives of the designation will not be compromised.

f. Alternatives should be explored before Green Belt locations are considered.

Land allocated for gypsies and travellers and travelling showpeople will be safeguarded for this purpose so long as a need exists in the District for accommodation for gypsies and travellers and travelling showpeople.

Proposals for sites for gypsies and travellers and travelling showpeople on other land outside existing settlement confines will only be permitted where it is first demonstrated that the development is for occupation by gypsies and travellers or travelling showpeople and that the proposed occupant has a need for accommodation that cannot be met on lawful existing or allocated sites in the region. In addition development proposals will need to comply with criteria a – e above.

For the purposes of this policy gypsies and travellers are people who meet the definition in Circular 01/06, as set out in the Core Strategy glossary.

Delivery Mechanisms:

The Allocations and Development Management DPD will set an overall level of future provision and identify sites to meet the provision.

The policy will be applied in considering planning applications for sites for gypsies and travellers and travelling showpeople

Performance Indicator:

Number of additional pitches provided

Target: To be set by the Allocations and Development Management DPD.
Housing Density

5.3.30 The proposed development strategy for the District is based on meeting future requirements by developing within existing settlements, particularly the larger towns, rather than extending into the Green Belt. This approach depends on using available sites within urban areas to their full potential, consistent with environmental factors. Using land efficiently means that each site contributes more, and less land in total is needed as a consequence to meet the District’s development requirements, with beneficial effects for protection of the countryside.

5.3.31 Higher density development will only be appropriate in relatively accessible locations where residents will have good access to services. The policy reflects this, varying density according to location.

5.3.32 In all cases development will only be acceptable where schemes are well-designed and do not compromise the overall character of the area. The appropriate density for individual schemes will vary taking account of the characteristics of the development site and surrounding area. All figures in the policy refer to net density.

Policy SP 7
Density of Housing Development

All new housing will be developed at a density that is consistent with achieving good design and does not compromise the distinctive character of the area in which it is situated. Subject to this overriding consideration:

1. Within the urban areas of Sevenoaks, Swanley and Edenbridge new residential development will be expected to achieve a density of 40 dwellings per hectare. In suitable locations close to Sevenoaks and Swanley town centres higher densities will be encouraged.

2. Within Sevenoaks and Swanley town centres, as defined under Policies LO3 and LO5, new residential development will be expected to achieve a density of 75 dwellings per hectare.

3. In other settlements not listed above new residential development will be expected to achieve a density of 30 dwellings per hectare.

Development proposals that fail to make efficient use of land for housing, having regard to the character and location of the area, may be refused permission.

Delivery Mechanisms:

The Allocations and Development Management DPD and Development Briefs will give guidance on the density of development for identified sites.

The policy will be applied in considering planning applications for residential development.

Residential Character Area Assessments and Conservation Area Management Plans will be considered where relevant in assessing development proposals.
Performance Indicator:

Average density of new housing development in the towns and town centres listed in the policy and the remainder of the District.

Target:

Average density of 40 dwellings per hectare across the District

5.4 Economic Development and Employment Land

5.4.1 The economy of the District is relatively broad based and has a higher than average level of employment in small firms and a lower than average level in large firms compared to the South East average. It is dominated by the service sector with the highest level of employment in wholesale and retail trade followed by business services. No sector is substantially over-represented in comparison with the regional average.

5.4.2 Sevenoaks is the largest employment centre and is primarily a centre for service industries. Swanley and Edenbridge also have significant concentrations of employment. Away from existing settlements the Major Developed Sites in the Green Belt at Fort Halstead and Glaxo Smith Kline in Leigh are centres for defence-related and pharmaceutical industries respectively. Further development to support these sectors will be supported where it is consistent with planning policy guidance on Major Developed Sites.

5.4.3 The District as a whole remains relatively prosperous despite the impact of the recession although unemployment has risen and deprivation and lack of skills is an issue in some areas.

5.4.4 The Council is preparing an Economic Development Action Plan, which sets out a range of initiatives to support the District’s economy. Key themes include improved liaison with local businesses, support for newly forming and expanding local firms, maintaining the supply of employment land, supporting initiatives to improve skills, increasing the provision of affordable housing, improving transport through the Transport Strategy and supporting the rural economy and tourism.

5.4.5 The LDF Core Strategy has a significant role in implementing the Action Plan in the provision it makes for development. Other sections of this document cover economic development in the main towns, rural areas, transport and affordable housing. With regard to employment land, the Employment Land Review examines the District’s existing stock of employment land for business use. It shows that there is a significant supply on a wide range of sites and that the great majority is acceptably located, although some sites are in need of modernisation to meet current business needs. The review estimates future additional land requirements at 0.3ha to 1.5ha after allowance is made for the loss of unsuitable sites to other uses.

5.4.6 The limited deficit in employment land supply can be made up through intensification and use of vacant land so the review does not see a need to release additional Greenfield land for employment use, beyond the development of a site at Swanley that has previously been identified.

5.4.7 Taking account of these findings the emphasis of the policy is on retaining and making effective use of existing employment land. Support is given to the principle of intensification and regeneration of existing sites where necessary to better meet modern business needs. The District’s employment sites are seen as a flexible resource that can be adapted, through redevelopment or change of use if necessary, for a range of different types of business use, including new and expanding sectors of the regional economy.
5.4.8 The policy allows for mixed use development on employment sites in urban areas where such development will assist in securing the regeneration of sites to meet business needs, where the employment capacity is maintained (recognising that the primary role of the site is in contributing to the supply of employment land), and where there is scope for such a development to take place in an environmentally acceptable way.

5.4.9 The development of “start up” units to support the establishment and early development of small businesses will be supported in suitable locations. Improvements in information and communications technology that enables more flexible working practices will be supported. A flexible approach will be adopted to home-based businesses and the development of “live work” units where these can take place in an environmentally acceptable way.

5.4.10 There is scope for further tourist-related development in the District and the location policies give support to hotel development in Sevenoaks and Swanley and improved facilities for visitors in Edenbridge, together with small scale initiatives to support tourism in rural areas.

5.4.11 Further information on specific provision for employment development in the District’s main towns and in the rural areas is contained in the Location Policies section of this document.

Policy SP 8
Economic Development and Land for Business

The sustainable development of the District’s economy will be supported by:

a. the retention, intensification and regeneration of existing business areas primarily at Sevenoaks, Swanley, and Edenbridge and Major Developed Sites in rural areas, subject to Green Belt policy.

b. through new provision for business as follows
   i. office development in Sevenoaks and Swanley town centres
   ii. business development through allocation of greenfield land at Swanley outside the Green Belt

c. giving priority to business uses, or tourist facilities, in the conversion of buildings in the rural area

d. promoting hotel development in suitable locations in Sevenoaks and Swanley

e. working with partners to develop initiatives to improve skills in the workforce

f. supporting the development of start up units for small businesses in suitable locations and improvements in information and communications technology to facilitate more flexible working practices

Sites used for business purposes will be retained in business use unless it can be demonstrated that there is no reasonable prospect of their take up or continued use for business purposes during the Core Strategy period. Redevelopment for mixed use of business sites in urban areas may exceptionally be permitted where such development would facilitate the regeneration of the site to more effectively meet the needs of modern business, where the employment capacity of the site, represented by the commercial floorspace, is maintained and where a mixed use development would represent a sustainable approach consistent with the general distribution of development.
### Delivery Mechanisms:

The Allocations and Development Management DPD will define the detailed boundary of employment sites to be retained under the policy.

### Performance Indicators:

- Net change in employment floorspace
- Unemployment rate in total and relative to Kent and the South East
- Proportion of the workforce with no qualifications

**Target:**

The overall stock of employment land to be maintained.

### 5.5 Infrastructure Policy

#### 5.5.1 Infrastructure can be defined as the various services and facilities that are necessary to help build sustainable communities. The Council has taken forward the definition of infrastructure from the South East Plan. References to physical, social and green infrastructure in policy SP9 should be seen as applying to this definition. The definition set out in the South East Plan (para. 5.22) includes transport facilities, affordable housing (considered in other Core Strategy policies), education, health services, social and community facilities, green infrastructure, public services, utilities and flood defences (the full definition is set out in the glossary of this plan). New development can create a need for new and improved infrastructure and in some circumstances its availability may be a factor in determining where new development is located. Supporting development with adequate infrastructure is important for balanced communities and the need for community facilities is specifically recognised in the Sevenoaks District Community Plan. Infrastructure improvements are also required to resolve existing identified deficiencies in Sevenoaks District.

#### 5.5.2 Government guidance requires Local Development Frameworks to identify future requirements needed to support the amount of development proposed, taking account of its type and distribution and how it will be provided. This should take account of existing strategies and be flexible enough to recognise that the optimum level of information may not be available from infrastructure providers when LDF documents are being prepared.

#### 5.5.3 An Infrastructure Delivery Plan for the District has been produced through engagement with providers. Provision for new development in the Sevenoaks District is relatively limited and the spatial strategy of the Core Strategy is based on maintaining the existing pattern of settlement. The Council considers that there are only a small number of infrastructure improvements where it has been sufficiently demonstrated that delivery is critical to the delivery of the Core Strategy. These are:

1. Education – additional capacity for primary school places are required in Sevenoaks and Swanley after 2011/12 and 2012/13, respectively. This will be provided through extensions to existing primary schools.
2. Transport – Measures to mitigate the impact of development in Swanley on the Strategic Road Network will be required. Examples of the measures that may be required are included in the ‘Swanley’ chapter of the Core Strategy.

3. Open Space, Sport and Recreation – The Council’s Open Space, Sport and Recreation study identifies a number of areas where the level of provision of open space, sport and recreation facilities is not sufficient to support further development. Improvements in provision or accessibility will be required, under policy SP10, to support development.

5.5.4 In addition to these ‘critical’ infrastructure schemes, providers have identified a range of improvements that they consider will serve the proposed development and overcome existing deficiencies but which are not considered to be critical to the delivery of the Core Strategy. The considerations that the Council have taken into account in making judgements about the criticality of infrastructure improvements are set out in the Infrastructure Delivery Schedule. SDC consider it appropriate that developers make a contribution towards necessary infrastructure improvements and community facilities that are proportionate to the impact of development and meets the tests of CIL Regulation 122 (see para 5.5.7). The Council do not consider that the assessment of a scheme as critical is a necessary prerequisite for the seeking of developer contributions. Both those schemes considered critical and not critical to support the scale and distribution of development proposed in the Core Strategy are set out in the Infrastructure Schedule These are also set out in the Infrastructure Schedule at Appendix 4.

5.5.5 The Council considers that the optimum level of information has not been available from all infrastructure providers during the process of preparing the Infrastructure Delivery Plan. In response to this, the Council will treat the Infrastructure Delivery Plan Schedule as a ‘live’ document and will identify the need for amendments through the LDF monitoring and review process. Preparation of the Allocations and Development Management DPD will provide the opportunity for providers to assess the detailed infrastructure requirements for development sites. The Allocations and Development Management DPD will set out these detailed infrastructure requirements.

Planning Obligations

5.5.6 Where new infrastructure or infrastructure improvements are required as a result of new development, the planning system allows, through planning obligations, for developers to provide, or appropriately contribute towards, the provision of this new or improved infrastructure.

5.5.7 Government policy on the use of planning obligations is set out in Circular 05/05 and part 11 of the Community Infrastructure Levy Regulations 2010. Regulation 122 of the CIL Regulations 2010 sets out three tests which should be met in order to ensure that the seeking of planning obligations is legal. These tests are, ensuring that planning obligations are ‘necessary to make the proposed development acceptable in planning terms’, “directly related to the development” and ‘fairly and reasonably related in scale and kind to the proposed development’. The effect of the infrastructure investment may be to confer some wider benefit on the community but payments should be directly related in scale to the impact which the proposed development will make. Planning obligations should not be used solely to resolve existing deficiencies.

5.5.8 Through engagement on the Infrastructure Delivery Plan for the District, a number of providers have indicated that they consider there to be a case for new development contributing towards improvements, as these will serve new populations resulting from development and resolve existing deficiencies. The Council will bring forward a Developer Contributions SPD, which will set out the levels of contributions and methodologies for calculating contributions that the Council will support.

5.5.9 The Council is also requiring a significant contribution from new housing towards affordable housing and requiring new development to meet progressively tightening standards of the Code for Sustainable Homes and BREEAM. In considering the appropriate level of contribution from new
development towards infrastructure the Council will take into account the importance of ensuring provision for affordable housing can be made in accordance with Policy SP3 and have regard to viability issues.

5.5.10 In April 2010, the Government published regulations for the introduction and operation of the Community Infrastructure Levy (CIL), which empower, but do not require local planning authorities to charge developers a standard, locally set, sum for local and sub-regional infrastructure, dependent on the type and character of development. In order to implement CIL, local authorities are required to produce a charging schedule setting out the rates that developers are required to pay, which is subject to independent examination.

5.5.11 Currently the Council does not consider that the level of investment in infrastructure required to support development in Sevenoaks District warrants the introduction of CIL. However, CIL Regulations place limits on the use of pooled contributions secured through planning obligations from April 2014 (Regulation 123). If, through consultation with infrastructure providers, it was deemed necessary to introduce CIL to secure infrastructure improvement necessary to support development in Sevenoaks District, the Council’s Infrastructure Delivery Plan and proposed Developer Contributions SPD would be used to develop a CIL charging schedule.

**Policy SP 9**

**Infrastructure Provision**

Where new development creates a requirement for new or improved physical, social and green infrastructure beyond existing provision, developers will be expected to provide, or contribute to, the additional requirement.

The Council will support the development of infrastructure facilities required to resolve existing deficiencies or to support the scale and distribution of development proposed in the Core Strategy.

**Delivery Mechanisms:**

*The Council will work with infrastructure providers and the Local Strategic Partnership to ensure the delivery of infrastructure improvements required to support delivery of the Core Strategy or resolve existing deficiencies, whilst considering the impact on local environment and existing amenities.*

*The Council will maintain the Infrastructure Schedule (Appendix 4) as a “live” document to be updated as required. Progress will be monitored and the need for changes identified through the Annual Monitoring Report. Where schemes are not delivered within the timescales set out, the Council will consult with the relevant lead bodies to identify new arrangements or alternative schemes.*

*The Allocations and Development Management DPD will set out specific infrastructure requirements for individual site allocations.*

*The Council will produce a Developer Contributions SPD, which will set out levels of contributions and methodologies for calculating contributions.*
5.6 Green Infrastructure, Open Space, Sport and Recreation

5.6.1 Sevenoaks District is generally well-provided for open space, sport and recreation facilities. As well as meeting recreational needs open spaces are an important feature contributing positively to the environment in many areas of the District. While overall provision is good there is a need for improvement in some areas.

5.6.2 The Council has carried out a study of open space, sport and recreation in the District in accordance with guidance on the subject produced by the Government. The study set Local Quantity Standards and Accessibility Standards and used these to assess current provision for the following types of open space:

- Parks and gardens, e.g. urban parks, formal public gardens, country parks
- Natural and semi-natural space, e.g. woodlands, urban forestry, scrubland, grasslands, wetlands, nature reserves, wastelands.
- Amenity green space, e.g. informal recreation spaces, green spaces
- Provision for children and young people, e.g. equipped play areas, ball courts, skateboard areas, teenage shelters
- Outdoor sports facilities, e.g. natural and artificial surfaces either publicly or privately owned which are used for sport and recreation
- Allotments and community gardens, i.e. allotments, urban farms
- Cemeteries and churchyards, e.g. private burial grounds, local authority burial grounds, disused churchyards
- Green corridors, e.g. canal/river towpaths, cycleways, rights of way, disused railway Lines

5.6.3 The Open Space, Sport and Recreation Study found that there is a need to provide for new sites and to improve the access to some existing sites within the District. It found a shortage of open space provision in Swanley, particularly south of the railway line, and in West Kingsdown. It also recommended that additional local provision be made for children's plan areas and allotments in various locations around the District. The Council will bring forward a Playing Pitch Strategy, in accordance with the recommendations of the Open Space, Sport and Recreation Study.

5.6.4 Proposals for new sites recommended in the study are generally small-scale and intended to meet local needs. They will only be taken forward where there is clear evidence of support from the local community. Additionally in some smaller villages with little provision for further development increased open space provision may not be viable.

5.6.5 The study included an assessment of indoor sports facilities, which assessed the supply of and demand for various different sports facilities in the District. It considered the quantity, quality and accessibility of these facilities. It concluded that there are no major deficiencies in sports facilities in the area with the exception of indoor tennis.

5.6.6 The Community Plan recognises the need to protect open spaces and promote the use of leisure facilities and open spaces. These are important in helping to create green and healthy environments. The Sevenoaks District Play Strategy 2007 – 2010 acknowledges the importance of
play for children and young people and seeks to identify ways in which play opportunities and experiences can be increased and enhanced across the Sevenoaks District. It includes an action plan which includes actions to:

- Improve opportunities for play and informal recreation
- Promote equality and social inclusion
- Promote health and physical activity
- Improve community safety and reducing fear of crime
- Promote partnerships with town and parish councils

5.6.7 National planning policy promotes the development of Green Infrastructure Networks through local development frameworks. In Sevenoaks District land identified through the Open Spaces Study will form a key input to the network as will accessible open space in the countryside. Land of biodiversity value, will also be a key input, including Biodiversity Opportunity Areas that have been defined for Kent based on the South East England Biodiversity Strategy and the Kent Biodiversity Action Plan. The Green Infrastructure Network will include consideration of possibilities for strengthening linkages between open spaces and potential wildlife corridors, linking open spaces within urban areas, open spaces connecting urban and rural areas and open spaces within rural areas. The Green Infrastructure Network will play an important role in helping communities to be more resilient to the effects of climate change. Provision for new development avoids extending built development into the countryside and, within urban areas, studies to identify potential development sites have sought to avoid sites designated for their wildlife value and open spaces of amenity or recreational value. Consequently the impact of development on the Green Infrastructure Network is limited but with the relatively limited provision for development in the District, the scope for creating additional green infrastructure in association with new development is also more limited than areas with higher development provision. The Council will work with relevant organisations to explore potential funding sources for enhancement of the Green Infrastructure Network in addition to seeking appropriate contributions from developers.

5.6.8 The Green Infrastructure Network will be developed through the Allocations and Development Management DPD which will identify areas of value for biodiversity, open space, sport and recreation purposes and protect them from development. It will also bring forward proposals for new sites to address deficiencies in provision identified in the Open Space, Sport and Recreation Study where they are supported by the local community.

5.6.9 Wherever possible, the Council will seek opportunities, including through new development, to create and extend green corridors and to enhance the biodiversity value of open space.

5.6.10 Residential development increases the demand for open space, sport and recreation facilities and this has a cumulative effect on existing provision. Therefore, the Council will require the provision of new or improved open space, sport and recreation facilities if development is proposed in areas where there is a deficiency in existing provision or in situations where the development itself would result in a deficiency in provision. Local standards in the Open Space, Sport and Recreation Study will be applied in determining whether there is a deficiency. The developer will also need to show how new open space facilities will be maintained.

Policy SP 10

Green Infrastructure, Open Space, Sport and Recreation Provision

A Green Infrastructure Network will be developed of accessible multi functional green space, primarily based on maintaining and linking existing areas of open space.
Open space, sport and recreation facilities, including indoor sports facilities of value to the local community will be retained. Development may exceptionally be allowed where replacement provision of at least equivalent value to the local community is provided.

Residential development proposals in areas where there is an existing shortage in open space provision, or where the development would otherwise result in a shortage in provision, will be expected to contribute to overcoming the shortage, either through on site provision or a financial contribution to off site provision. Provision should include arrangements for maintenance of the open space.

For the purposes of this policy, open space includes amenity open space, parks and formal gardens, natural and semi natural open space, children's play areas, outdoor sports facilities, churchyards and allotments.

Delivery Mechanisms:

The Allocations and Development Management DPD will set out proposals for the Green Infrastructure Network which will include, areas of value for biodiversity, opportunities and locations for biodiversity enhancement (including creation of new habitats) taking account of defined Biodiversity Opportunity Areas, open space sites identified for retention under the policy, new areas of open space taking account of the findings of the Open Spaces Study, opportunities for linking open spaces and areas of biodiversity value to improve connectivity for people and wildlife and targets for implementation and proposals for effective long term management of sites forming part of the network.

The Local Standards set out in the Open Spaces Study will be used to determine whether a development needs to contribute additional open space.

Performance Indicators

Maintenance of open space safeguarded through the Allocations and Development Management DPD

Additional open space provided through new development

Additions and losses to the Green Infrastructure Network, measured by area (Note: baseline to be established through the definition of the Green Infrastructure Network in the Allocations and Development Management DPD).

5.7 Biodiversity

5.7.1 Government guidance aims to promote sustainable development by ensuring that biological diversity is conserved and enhanced as an integral part of social, environmental and economic development. The Kent Habitat Survey (2003) identified habitats of importance within the District. The District contains no Special Area of Conservation (SAC) or Special Protection Areas (SPA) of European importance, but the Habitat Regulations Assessment concludes that there may be a very small impact on the Ashdown Forest SAC and SPA from additional development proposed in the Core Strategy for the District. In accordance with the recommendations of the Assessment the Council
will support the work of the High Weald AONB Joint Advisory Committee in managing recreational pressures on Ashdown Forest. Application of Policy SP10 will ensure recreational open space remains available to meet local needs in the District.

5.7.2 There are 17 Sites of Special Scientific Interest, (SSSIs) within the District, which are of national importance for their biological or geological interest, and 57 Local Wildlife Sites, identified by the Kent Wildlife Trust, which are of County-wide importance. Ancient woodlands are a feature of the countryside and are also a particularly rich source of biodiversity that should be afforded a high level of protection. A comprehensive survey of the District’s Ancient Woodlands is shortly to be carried out.

5.7.3 However, biodiversity is not confined to protected sites but occurs throughout rural and urban areas. It is therefore important, and in accordance with Government advice, that Biodiversity Action Plan priority habitats and species are protected and enhanced wherever they occur.

5.7.4 In designating appropriate areas for development, the Core Strategy has ensured that designated areas of importance for biodiversity will not directly be harmed and new development should avoid damage to the ecological value of such areas. The extent and location of designated sites is shown in Figure 7. New development, whether on brownfield or greenfield sites, gives the opportunity to create or restore areas of biodiversity, based on the priority habitats and species set out in the National and Kent Biodiversity Action Plans (BAPs) and on Biodiversity Opportunity Areas that have been defined for Kent. The Council will expect such proposals to be an integral part of new development. Where there are opportunities, the design of new developments, including open spaces, should incorporate habitat linkages that provide the opportunity to enhance biodiversity. Further guidance can be found in ‘Biodiversity By Design’ and the Biodiversity Appendix to the Kent Design Guide, 2006. Support will be given to the application of agri-environment schemes, forestry, flood defence and other land management practices to deliver biodiversity targets, increase the wildlife value of land, reduce diffuse pollution, and protect soil resources.

Policy SP 11

Biodiversity

The biodiversity of the District will be conserved and opportunities sought for enhancement to ensure no net loss of biodiversity.

Sites designated for biodiversity value will be protected with the highest level of protection given to nationally designated Sites of Special Scientific Interest, followed by Local Wildlife Sites and sites of local importance for biodiversity. Designated sites will be managed with the primary objective of promoting biodiversity whilst also providing for appropriate levels of public access.

Opportunities will be sought for the enhancement of biodiversity through the creation, protection, enhancement, extension and management of sites and through the maintenance and, where possible, enhancement of a green infrastructure network to improve connectivity between habitats.

Delivery Mechanisms:

The Allocations and Development Management DPD will set out proposals for a Green Infrastructure Network which will include existing sites of biodiversity value and other open spaces and opportunities for improvement and enhancement of sites for biodiversity.
The Allocations and Development Management DPD and planning briefs where relevant, will provide site specific guidance on the maintenance and enhancement of biodiversity on new development sites taking into account biodiversity guidance in Kent Design which has been adopted by the Council as a Supplementary Planning Document.

National and local wildlife sites will be managed through agreements with Natural England, the Kent Wildlife Trust and local groups to maintain and improve their biodiversity

Performance Indicator:

Number of Local Wildlife Sites in positive management
Figure 7: Extent and location of designated sites
Appendices
The Housing Trajectory shows progress towards meeting the Core Strategy housing provision. It includes completions to 2009 (692 units), and the extant permissions and SHLAA sites for the first 15 years. The extant permissions and SHLAA sites are phased, according to when it is thought that they will be completed, and after the first 10 years an allowance of 75 units is added in for small windfall sites.

These figures give the projected level of completions against the yearly requirement. These cumulative figures give the District’s progress towards meeting the housing provision and its ability in the future to meet it by the end of the plan period. The Trajectory shows that we will be able to meet the Core Strategy housing provision and if our assumptions are correct we will reach the provision by 2022.
The saved policies listed below are replaced by the Core Strategy. The remaining saved policies will continue to apply until replaced by the Allocations and Development Management DPD.

The replacement of policies EN7, EN8, SG1A (Edenbridge only) and VP8 involve changes to the Proposals Map. The area affected by the replacement of SG1A is shown in Figure 6 in the Edenbridge chapter while the other changes are shown in the plans following the table.

This Appendix shows how the Core Strategy implements relevant parts of the Council’s Community Plan. Priority aims marked in bold are those that the Community Plan states will be implemented in whole or in part through the LDF. Other aims are listed where the Core Strategy policy is relevant though the Community Plan itself does not make an explicit link.

<tr>
<td>Policy SP9 states that all new development which creates a requirement for physical, social and green infrastructure provision will be expected to provide or contribute to this infrastructure.</td>
<td>Aim: Ensure that communities have access to good community buildings and facilities.</td>
</tr>
<tr>
<td>Policy SP10 supports this aim by protecting and enhancing provision of facilities sport and recreation in the District</td>
<td>Aim: Extend access to services in schools so that schools are at the heart of communities.</td>
</tr>
<tr>
<td>Policy SP10 supports this aim by protecting and enhancing provision of facilities sport and recreation in the District</td>
<td>Aim: Enable local, social, community and cultural activities to flourish for all age groups.</td>
</tr>
</tbody>
</table>
This schedule will be treated as a ‘live’ document. The following version was considered the most appropriate schedule, based on information available to the Council in January 2010. The most up-to-date version will be available on the Planning Policy pages of www.Sevenoaks.gov.uk.

Bold text identifies those infrastructure improvements required as a direct result of development proposed in the Sevenoaks District Core Strategy.

As a result of the infrastructure engagement process, a number of infrastructure improvements have been categorised as being critical to the delivery of the LDF Core Strategy. Whether or not an infrastructure improvement is considered critical to the delivery of the LDF Core Strategy is based on a judgement as to what extent the improvement is required as a result of new development or as a result of existing deficiencies and consideration of the situation if the infrastructure improvement were not made but development went ahead. The judgement takes account of the evidence available to the Council about the existing capacities and current usage of infrastructure, the likely increase in population as a result of development and the likely increase in usage of facilities. This includes KCC’s strategy based population forecasts (September 2009), which show a very modest population increase in Sevenoaks District in the period 2006 – 2026.

SDC consider it appropriate that developers make a contribution towards necessary infrastructure improvements and community facilities that are proportionate to the impact of development and meets the tests of CIL Regulation 122 (see para 5.5.7). The Council do not consider that the assessment of a scheme as critical is a necessary prerequisite for the seeking of developer contributions.

Environment and Community

- Does the development provide (or is it close to) community facilities, such as a school, parks, play areas, shops, pubs or cafes?
- Is there an accommodation mix that reflects the needs and aspirations of the local community?
- Is there a tenure mix that reflects the needs of the local community?
- Does the development have easy access to public transport?
- Does the development have any features that reduce its environmental impact?

Character

- Is the design specific to the scheme?
- Does the scheme exploit existing buildings, landscape or topography?
- Does the scheme feel like a place with distinctive character?
- Do the buildings and layout make it easy to find your way around?
- Are streets defined by a well-structured building layout?

Streets, Parking and Pedestrianisation

- Does the building layout take priority over the streets and car parking, so that the highways do not dominate?
- Is the car parking well integrated and situated so it supports the street scene?
- Are the streets pedestrian, cycle and vehicle friendly?
- Does the scheme integrate with existing streets, paths and surrounding development?
- Are public spaces and pedestrian routes overlooked and do they feel safe?

Design and Construction

- Is public space well designed and does it have suitable management arrangements in place?
- Do the buildings exhibit architectural quality?
- Do internal spaces and layout allow for adaptation, conversion or extension?
- Has the scheme made use of advances in construction or technology that enhance its performance, quality and attractiveness?
- Do buildings or spaces outperform statutory minima, such as building regulations?
Affordable housing

‘Affordable housing includes social rented and intermediate housing, provided to specified eligible households whose needs are not met by the market. Affordable housing should:

– Meet the needs of eligible households including availability at a cost low enough for them to afford, determined with regard to local incomes and local house prices.

– Include provision for the home to remain at an affordable price for future eligible households or, if these restrictions are lifted, for the subsidy to be recycled for alternative affordable housing provision’.

Air Quality Management Area (AQMA)

The Environment Act 1995 requires local councils to regularly assess the air quality in their area to see if any of the key pollutants in the National Air Quality Strategy are likely to exceed the targets currently set. In locations where this is likely to happen and where the public are exposed to the pollution, the Council is required to designate an ‘Air Quality Management Area’.

Annual Monitoring Report (AMR)

A report submitted to the government by local planning authorities or regional planning bodies assessing progress with and the effectiveness of a Local Development Framework.

Area of Outstanding Natural Beauty (AONB)

An area with statutory national landscape designation, the primary purpose of which is to conserve and enhance natural beauty. Together with National Parks, AONB represent the nation’s finest landscapes. AONB are designated by the Countryside Agency.

BREEAM

Building Research Establishment Environmental Assessment Method

BREEAM is the world's most widely used environmental assessment method for buildings. BREEAM assesses buildings against a set criteria and provides an overall score which will fall within a band providing either a; PASS, GOOD, VERY GOOD, EXCELLENT or OUTSTANDING rating.

Brownfield

Previously developed land which is or was occupied by a permanent structure, including the curtilage of the developed land and any associated fixed surface infrastructure.

Code for Sustainable Homes

The Code measures the sustainability of a new home against nine categories of sustainable design, rating the 'whole home' as a complete package. The Code uses a 1 to 6 star rating system to communicate the overall sustainability performance of a new home. The Code sets minimum standards for energy and water use at each level.

Conservation Areas

Areas of special architectural or historical interest, where development is more tightly restricted than elsewhere in order to preserve and enhance their special character and qualities. These areas are designated by the Local Planning Authority under Section 69 of the Planning (Listed Buildings and Conservation Areas) Act 1990 which gives them statutory recognition and protection.

Core Strategy

The Local Development Framework core strategy is the spatial vision for what a local authority wants to achieve. It contains a set of strategic policies that are required to deliver the vision including the broad approach to development.
**Development Plan Documents (DPD)**
The documents that a local planning authority must prepare, and which have to be subject to rigorous procedures of community involvement, consultation and independent examination. Should include the following elements

- Core strategy
- Site specific allocations of land
- Area action plans (where needed); and
- Proposals map (with inset maps, where necessary).

**Green Belt**
Areas of land where there is a strong presumption against development except that which falls into certain limited categories. The purposes of Green Belts are to check the unrestricted sprawl of urban areas, stop the joining of neighbouring towns, safeguard the surrounding countryside, preserve the special character of the area, assist in urban regeneration and to serve as a recreational resource.

**Greenfield**
Land (or a defined site) usually farmland, that has not previously been developed.

**Green Infrastructure**
The following areas can form part of the networks of Green Infrastructure

Parks and gardens - including urban parks, country parks and formal gardens.

Natural and semi-natural urban greenspaces - including woodlands, urban forestry, scrub, grasslands (e.g. downlands, commons and meadows), wetlands, open and running water, wastelands and derelict open land and rock areas (e.g. cliffs, quarries and pits).

Green corridors - including river and canal banks, cycleways, and rights of way

Outdoor sports facilities (with natural or artificial surfaces, either publicly or privately owned) including tennis courts, bowling greens, sports pitches, golf courses, athletics tracks, school and other institutional playing fields, and other outdoor sports areas.

Amenity greenspace (most commonly, but not exclusively, in housing areas) – including informal recreation spaces, greenspaces in and around housing, domestic gardens and village greens.

Provision for children and teenagers - including play areas, skateboard parks, outdoor basketball hoops, and other more informal areas (e.g. ‘hanging out’ areas, teenage shelters).

Allotments, community gardens, and city (urban) farms.

Cemeteries and churchyards.

Accessible countryside in urban fringe areas.

River and canal corridors.

Green roofs and walls.
Gypsies and Travellers
Persons of nomadic habit of life whatever their race or origin, including such persons who on grounds only of their own or their family's or dependants' educational or health needs or old age have ceased to travel temporarily or permanently, but excluding members of an organised group of travelling show people or circus people travelling together as such. (source: Government Circular 01/06)

Historic Parks and Gardens
A park or garden of special historic interest. Graded I (highest quality), II* or II. Designated by English Heritage.

Housing Trajectory
Local Planning Authorities are required to prepare a housing trajectory. This provides a position statement comparing past performance on housing supply with anticipated future rates of housing development. The trajectory is updated each year as part of the Annual Monitoring Report.

Infrastructure

Transport
Airports, port, road network, cycling and walking infrastructure, rail network

Housing
Affordable housing

Education
Further and higher education, secondary and primary education and nursery schools

Health
Acute care and general hospitals, mental hospitals, health centres/primary care trusts and ambulance services

Social Infrastructure
Supported accommodation, social and community facilities, sports centres, open spaces, parks and play space

Green Infrastructure
See under Green Infrastructure

Public Services
Waste management and disposal, libraries, cemeteries, emergency services, (police, fire, ambulance) places of worship, prisons, and drug treatment centres

Utility Services
Gas supply, electricity supply, heat supply, water supply, waste water treatment and telecommunications infrastructure.

Flood Defences

Listed Building
A building of special architectural or historic interest. Listed buildings are graded I, II* or II with grade I being the highest. Listing includes the interior as well as the exterior of the building, and any buildings or permanent structures (e.g. wells within its curtilage). Designated by English Heritage.

Local Development Document (LDD)
Local Development Documents will comprise of Development Plan Documents, Supplementary Planning Documents, Statement of Community Involvement.

Local Development Framework (LDF)
The LDF contains a portfolio of Local Development Documents which provides the local planning authority’s policies for meeting the community’s economic, environmental and social aims for the future of their area where this affects the development of land.
Local Development Scheme (LDS)
The LDS sets out the programme for preparing the Local Development Documents.

Local Wildlife Site
Local wildlife sites, previously known as Sites of Nature Conservation Interest (SNCIs), are sites which are important to nature conservation interests in a local context.

Major Developed Site (MDS)
Green Belts contain some major developed sites such as factories, collieries, power stations, water and sewage treatment works, military establishments, civil airfields, hospitals, and research and education establishments. These substantial sites may be in continuing use or be redundant. They often pre-date the town and country planning system and the Green Belt designation.

These sites remain subject to development control policies for Green Belts.

Planning Policy Guidance Note (PPG)/Planning Policy Statement (PPS)
Planning Policy Guidance Notes (PPGs), and their replacements Planning Policy Statements (PPSs), are prepared by the government after public consultation to explain statutory provisions and provide guidance to local authorities and others on planning policy and the operation of the planning system.

Local authorities must take their contents into account in preparing their development plan documents.

Renewable Energy
Renewable energy covers those energy flows that occur naturally and repeatedly in the environment – from the wind, the fall of water, the movement of the oceans, from the sun and also from biomass. Low carbon technologies are those that can help reduce carbon emissions. Renewable and low-carbon energy supplies include, but not exclusively, those from biomass and energy crops; CHP/CCHP (and micro-CHP); energy-from-waste; ground source heating and cooling; hydro; solar thermal and photovoltaic generation; wind generation.

Settlement Hierarchy
The arrangement of settlements within a given area in order of importance.

Site of Special Scientific Interest
A site identified under the Wildlife and Countryside Act 1981 (as amended by the Countryside and Rights of Way Act 2000) as an area of special interest by reason of any of its flora, fauna, geological or physiographical features (e.g. plants, animals, and natural features relating to the Earth's structure).

Small Site Allowance
This is an allowance for housing completions from sites under 0.2 hectares that are not on previously developed land and that have not been allocated or identified for housing. The allowance is calculated based on historic trends within the Sevenoaks District and, in accordance with Government guidance, is not included for the first 10 years of the plan period when specific sites should be identified.

South East Plan
The South East Plan is the regional framework for managing future development in the South East and was adopted in May 2009. It replaces the previous government planning guidance for the South East. This framework was prepared by the South East England Regional Assembly (now South East England Partnership Board) and sets the standards and principles for the physical development of the region for 20 years (2006 – 2026) and will be used to guide the production of Local Development Frameworks and strategies by district and unitary councils.
Statement of Community Involvement (SCI)
The Statement of Community Involvement sets out the processes to be used by the local authority in involving the community in the preparation, alteration and continuing review of all local development documents and development control decisions. It is an essential part of the Local Development Framework.

Strategic Flood Risk Assessment (SFRA)
This report provides an overview of the methodology, assumptions, uncertainties, tasks undertaken and the links to the wider sustainability appraisal process. It provides policy recommendations and guidance for the application of the Sequential Test, the preparation of flood risk assessments and the use of sustainable drainage systems, within the Council’s administrative boundary.

Strategic Housing Land Availability Assessment (SHLAA)
A Strategic Housing Land Availability Assessment should:

- Assess the likely level of housing that could be provided if unimplemented planning permissions were brought into development.
- Assess land availability by identifying buildings or areas of land (including previously developed land and Greenfield) that have development potential for housing, including within mixed use developments.
- Assess the potential level of housing that can be provided on identified land.
- Where appropriate, evaluate past trends in windfall land coming forward for development and estimate the likely future implementation rate.
- Identify constraints that might make a particular site unavailable and/or unviable for development.
- Identify sustainability issues and physical constraints that might make a site unsuitable for development.
- Identify what action could be taken to overcome constraints on particular sites.

Strategic Housing Market Assessment (SHMA)
A Strategic Housing Market Assessment should:

- Estimate housing need and demand in terms of affordable and market housing.
- Determine how the distribution of need and demand varies across the plan area, for example, as between the urban and rural areas.
- Consider future demographic trends and identify the accommodation requirements of specific groups such as, homeless households, Black and Minority Ethnic groups, first time buyers, disabled people, older people, Gypsies and Travellers and occupational groups such as key workers, students and operational defence personnel.

Supplementary Planning Document (SPD)
SPDs provide further guidance regarding how Local Development Framework policies should be implemented.

Sustainability Appraisal (SA)
Assessment of the social, economic, and environmental impacts of the policies and proposals contained within the Local Development Framework.
Sustainable Urban Drainage System (SUDS)
An alternative approach from the traditional ways of managing runoff from buildings and hardstanding. They can reduce the total amount, flow and rate of surface water that runs directly to rivers through stormwater systems.

Travelling Showpeople
Members of a group organised for the purposes of holding fairs, circuses or shows (whether or not travelling together as such). This includes such persons who on the grounds of their own or their family’s or dependent’s more localised pattern of trading, educational or health needs or old age have ceased to travel temporarily or permanently, but excludes Gypsies and Travellers as defined in ODPM Circular 1/2006 (CLG Circular 04/07)

Windfall Site
A site not specifically allocated for development in a development plan, but which unexpectedly becomes available for development during the lifetime of a plan. Most “windfalls” are referred to in a housing context. They tend to be very small sites for one or a small number of homes.
